<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 General requirements</b> .....	<b>2</b>
<b>5 Classification</b> .....	<b>2</b>
<b>6 Materials and construction</b> .....	<b>2</b>
<b>7 Dimensions and tolerances</b> .....	<b>3</b>
7.1 Diameters, thickness of lining and cover and bend radii.....	3
7.2 Length of hoses and hose assemblies and tolerances.....	3
7.3 Concentricity.....	3
<b>8 Physical properties of compounds</b> .....	<b>3</b>
<b>9 Physical properties of finished hoses and hose assemblies</b> .....	<b>4</b>
<b>10 Resistance to steam</b> .....	<b>5</b>
10.1 Principle.....	5
10.2 Short-term exposure.....	5
10.3 Long term test.....	5
10.4 Observations.....	5
10.5 Additional tests.....	5
<b>11 Electrical resistance</b> .....	<b>5</b>
<b>12 Type testing</b> .....	<b>6</b>
<b>13 Marking</b> .....	<b>6</b>
13.1 Hoses.....	6
13.2 Hose couplings.....	7
13.3 Identification of hose assemblies.....	7
<b>14 Frequency of testing</b> .....	<b>7</b>
<b>15 Storage and admissible storage time</b> .....	<b>8</b>
<b>Annex A (informative) Test frequency for hose assemblies in use</b> .....	<b>9</b>
<b>Annex B (normative) Type and routine test</b> .....	<b>10</b>
<b>Bibliography</b> .....	<b>11</b>

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at [www.iso.org/patents](http://www.iso.org/patents). ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 1, *Rubber and plastics hoses and hose assemblies*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 218, *Rubber and plastics hoses and hose assemblies*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This fifth edition cancels and replaces the fourth edition (ISO 6134:2017), which has been technically revised.

The main changes are as follows:

- normative references have been updated;
- methods used for bending have been corrected in accordance with ISO 10619-1;
- methods used for measuring electrical properties have been corrected in accordance with ISO 8031.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
