Second edition
1999-05-15

Water quality — Enumeration of culturable micro-organisms — Colony count by inoculation in a nutrient agar culture medium

*Qualité de l'eau — Dénombrement des micro-organismes revivifiants —
Comptage des colonies par ensemencement dans un milieu de culture nutritif
gélifié*

Reference number
ISO 6222:1999(E)

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this International Standard may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 6222 was prepared by the European Committee for Standardization (CEN) in collaboration with ISO Technical Committee TC 147, *Water quality*, Subcommittee SC 4, *Microbiological methods*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Throughout the text of this document, read "...this European Standard..." to mean "...this International Standard...".

This second edition cancels and replaces the first edition (ISO 6222:1988), which has been technically revised.
