

Second edition
2021-04

Structural steels —

Part 1: General technical delivery conditions for hot-rolled products

Aciers de construction —

Partie 1: Conditions générales techniques de livraison pour les produits laminés à chaud

Reference number

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Classification and designation	2
4.1 Classification.....	2
4.2 Designation.....	2
5 Information to be supplied by the purchaser	3
5.1 Mandatory information.....	3
5.2 Options.....	3
6 Requirements	4
6.1 Steelmaking process.....	4
6.2 Delivery condition.....	4
6.3 Chemical composition.....	4
6.3.1 Heat analysis.....	4
6.3.2 Product analysis.....	4
6.3.3 Carbon equivalent value.....	4
6.4 Mechanical properties.....	4
6.4.1 General.....	4
6.4.2 Tensile properties.....	5
6.4.3 Charpy V-notch impact properties.....	5
6.4.4 Through-thickness properties.....	5
6.5 Surface condition.....	5
6.6 Internal soundness.....	5
6.7 Dimensions, tolerances on dimensions and shape, and mass.....	5
6.7.1 Dimensions, tolerances on dimensions and shape.....	5
6.7.2 Calculation of mass.....	5
7 Inspection	5
7.1 Types of inspection and inspection documents.....	5
7.2 Tests to be carried out.....	6
7.3 Retests.....	6
8 Sampling	6
8.1 General.....	6
8.2 Frequency of testing.....	6
8.2.1 Verification of chemical composition.....	6
8.2.2 Verification of mechanical properties.....	6
8.2.3 Tests to be carried out for specific inspection.....	6
8.3 Selection and preparation of samples and test pieces.....	7
8.3.1 Sampling and sample preparation.....	7
8.3.2 Preparation of samples and test pieces.....	7
9 Test methods	7
9.1 Chemical analysis.....	7
9.2 Tensile test.....	8
9.3 Impact test.....	8
9.4 Through-thickness characteristics test.....	8
9.5 Ultrasonic test.....	8
10 Marking	8
Annex A (informative) Applicable standards on dimensions, tolerances, shape and mass	10
Bibliography	11

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 17, Steels, Subcommittee SC 3, *Steels for structural purposes*.

This second edition cancels and replaces the first edition (ISO 630-1:2011), which has been technically revised. The main changes compared to the previous edition are as follows:

- List of normative references has been updated.
- In Tables, the designations concerning thickness have been changed to “nominal thickness”.
- ISO 657-16 has been deleted from [Clause 2](#) and the text in [6.7.1](#).
- Terms and definitions of “non-specific inspection” and “specific inspection” have been deleted, because ISO 404 and ISO 10474 have been added in [Clause 2](#).
- Designation of qualities has been added.
- List of options has been updated.
- Content of [Table A.1](#) has been updated.
- The bibliography has been updated.
- The content of the document has been updated to harmonize with all parts of ISO 630.

A list of all parts in the ISO 630 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
