## Contents

	Page
<b>Foreword</b> .....	<b>v</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Voltage classes</b> .....	<b>6</b>
<b>5 General requirements</b> .....	<b>6</b>
5.1 Environmental and operational requirements.....	6
5.2 Marking.....	7
5.2.1 Marking of voltage class B electric components.....	7
5.2.2 Marking of voltage class B wiring.....	7
<b>6 Requirements for protection of persons against electric shock</b> .....	<b>7</b>
6.1 General requirements.....	7
6.1.1 General requirements for connected sections of a circuit.....	7
6.1.2 General requirements for voltage class B1.....	7
6.1.3 General requirements for voltage class B2.....	8
6.2 Basic protection.....	8
6.3 Fault protection and additional measures.....	8
6.3.1 Equipotential bonding.....	8
6.3.2 Isolation resistance.....	9
6.3.3 Provisions for capacitive coupling and capacitive discharge.....	10
6.3.4 De-energization.....	11
6.3.5 Alternative protection measures.....	11
6.4 General requirements for protective provisions.....	12
6.4.1 General.....	12
6.4.2 Requirements for insulation.....	12
6.4.3 Requirements for protective barriers and protective enclosures.....	12
6.4.4 Requirements for connectors.....	13
6.4.5 Insulation coordination.....	13
6.5 Alternative approach for protection against electric shock.....	13
<b>7 Protection against thermal incidents</b> .....	<b>13</b>
7.1 Overload protection.....	13
7.2 Short-circuit protection.....	13
<b>8 Requirements for vehicle power supply circuit</b> .....	<b>14</b>
<b>9 Owner's manual</b> .....	<b>14</b>
<b>10 Test procedures</b> .....	<b>14</b>
10.1 General.....	14
10.2 Continuity test for equipotential bonding.....	14
10.3 Isolation resistance measurements for voltage class B2 electric circuits.....	14
10.3.1 Preconditioning and conditioning.....	14
10.3.2 Isolation resistance measurements of the balance of electric circuits.....	15
10.3.3 Isolation resistance measurement of the voltage class B2 electric power sources.....	15
10.3.4 Isolation resistance measurement of entire electric circuits.....	18
10.4 Test for isolation resistance monitoring system.....	18
10.5 Touch current.....	18
10.6 Withstand voltage test.....	19
10.6.1 General.....	19
10.6.2 Preconditioning and conditioning.....	19
10.6.3 Test procedure.....	19
10.6.4 Test criteria.....	20
10.7 Withstand voltage test for electric power sources which are not de-energized.....	20

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 22 *Road vehicles*, Subcommittee SC 37, *Electrically propelled vehicles*.

This fourth edition cancels and replaces the third edition (ISO 6469-3:2018), which has been technically revised. It also incorporates the Amendment ISO 6469-3:2018/Amd.1:2020.

The main changes are as follows:

- changes from ISO 6469-3:2018/Amd.1:2020 were implemented,
- requirements for equipotential bonding were revised.

A list of all parts in the ISO 6469 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).
