Contents

	Page
Foreword	iv
1 Scope	1
2 Normative reference	1
3 Terms and definitions	1
4 General	2
5 Gauge dimensions	2
6 Determination of reference point X_0	2
7 Front hand-guard dimensions	5
7.1 Front hand-guard width, W_1	5
7.2 Front hand-guard height over front handle, H_1 and H_{1A}	5
7.3 Line between X_0 and the rearmost part of unprotected saw chain	6
7.4 Front hand-guard openings, H_3	6
8 Clearance between the hand-guard and the chain saw body, H_2	7
9 Clearances between the hand-guard and the front handle	7

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 6533 was prepared by Technical Committee ISO/TC 23, *Tractors and machinery for agriculture and forestry*, Subcommittee SC 17, *Manually portable forest machinery*.

This fourth edition cancels and replaces the third edition (ISO 6533:2001), which has been technically revised primarily concerning the determination of reference point X_0 .
