Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Piston ring codes	1
5 Designation of piston rings	4
5.1 Designation elements and order.....	4
5.1.1 General.....	4
5.1.2 Mandatory elements.....	4
5.1.3 Measurement principles.....	5
5.1.4 Additional elements.....	5
5.1.5 Elements for additional marking.....	5
5.2 Designation examples.....	5
5.2.1 Designation example of a piston ring in accordance with ISO 6622-1.....	5
5.2.2 Designation example of a piston ring in accordance with ISO 6624-1.....	5
5.2.3 Designation example of a piston ring in accordance with ISO 6626-1.....	6
6 Designation of piston rings	6
6.1 General.....	6
6.2 Mandatory topside identification marking.....	6
6.3 Additional marking.....	7
7 General characteristics	7
7.1 Ring shape.....	7
7.2 Light tightness.....	8
7.3 Closed gap.....	8
7.4 Tangential force, F_t , and diametral force, F_d , of single piece piston rings.....	8
7.4.1 Calculation of F_t , and F_d values in dimension tables of dimensional standards.....	8
7.4.2 Correction of F_t and F_d values.....	9
7.4.3 Examples for correction of F_t and F_d	10
7.5 Tangential force F_t of multipiece oil control rings as specified in ISO 6626-1, ISO 6626-2, and ISO 6626-3.....	12
7.5.1 General.....	12
7.5.2 Rounding of values.....	12
7.5.3 Examples for calculating tangential force F_t	12
7.6 Tangential force F_t of expander/rail oil control rings as specified in ISO 6627.....	13
7.6.1 General.....	13
7.6.2 Example for calculating the tangential force F_t — Selected type of piston ring: ISO 6627 –ES3 – 85 × 3 – MC67 MC68/CR1 PNH.....	13
8 Notches for preventing ring rotation	13
8.1 Ring joint with internal notch (only for compression rings as specified in ISO 6622 and ISO 6624).....	13
8.2 Ring joint with side notch (only for compression rings as specified in ISO 6622).....	15
9 Machining of surfaces	16
9.1 Peripheral surfaces.....	16
9.2 Side faces.....	16
9.3 Other surfaces.....	16
10 Plated, coated, and treated surfaces	17
10.1 Chromium plating on peripheral and side surfaces.....	17
10.1.1 General.....	17
10.1.2 Chromium plating thickness.....	17
10.1.3 Chromium plated rings of fully faced design.....	17

This is a preview of ISO 6621-4:2024. [Click here to purchase the full version from the ANSI store.](#)

10.1.6	Side Chromium plated rings design	19
10.1.7	Radius, chamfer and dimensions of peripheral edges of chromium plated rings.....	19
10.1.8	Peripheral edges at the gap of chromium plated rings and rails.....	20
10.1.9	Hardness of chromium plating.....	21
10.2	Spray-coated peripheral surfaces.....	21
10.2.1	Codes.....	21
10.2.2	Spray-coating thickness.....	21
10.2.3	Spray-coated rings of fully faced design.....	21
10.2.4	Spray-coated rings of semi-inlaid design.....	21
10.2.5	Spray-coated rings of inlaid design.....	22
10.2.6	Radius, chamfer of peripheral edges of spray-coated rings.....	23
10.2.7	Peripheral edges at gap of spray-coated rings.....	23
10.2.8	Hardness of spray-coating.....	24
10.3	Nitride surfaces.....	24
10.3.1	Codes.....	24
10.3.2	Nitride case depth.....	24
10.3.3	Radius and dimensions of outside and inside edges of nitride steel rings.....	25
10.3.4	Peripheral edges at the gap of nitride steel rings and rails.....	25
10.4	Treated surfaces.....	26
10.4.1	Ferro-oxidized all over — Code FE — Coating thickness (0,001 to 0,005) mm.....	26
10.4.2	Phosphated all over — Code PO — Coating thickness 0,002 mm min.....	26
10.4.3	Phosphated all over — Code PR — Coating thickness 0,002 mm max.....	26
10.5	Physical vapour deposition coating (PVD).....	26
10.5.1	Codes.....	26
10.5.2	PVD coating.....	26
10.5.3	PVD coating thickness.....	26
10.5.4	Hardness of PVD coating.....	26
10.5.5	Peripheral edges at the gap of PVD-coated rings and rails.....	27
11	Miscellaneous.....	27
11.1	Cleanliness.....	27
11.2	Corrosion protection.....	27
11.3	Packaging.....	27
12	Traceability (optional).....	27
	Bibliography.....	28

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 22, *Road vehicles*, Subcommittee SC 34, *Propulsion, powertrain and powertrain fluids*.

This fourth edition cancels and replaces the third edition (ISO 6621-4:2015), which has been technically revised.

The main changes are as follows:

- harmonization of the nomenclature with revised standards;
- side notch dimensioning revised.

A list of all parts in the ISO 6621 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
