Contents

	Page
Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
3.1 Mechanical parts of spot, projection, and seam welding equipment.....	2
3.2 Mechanical parts of upset and flash welding equipment.....	8
3.3 Static mechanical characteristics.....	11
3.4 Electrical and thermal characteristics.....	14
3.5 Pneumatic and hydraulic characteristics.....	16
4 Symbols and abbreviated terms	16
5 Physical environment and operating conditions	18
5.1 General.....	18
5.2 Ambient air temperature.....	18
5.3 Liquid cooling medium.....	18
5.4 Humidity.....	18
5.5 Altitude.....	19
5.6 Transportation and storage.....	19
6 Test conditions	19
6.1 General.....	19
6.2 Environmental conditions.....	19
6.3 Measuring instruments.....	19
7 Rated no load voltage at the output	20
7.1 General.....	20
7.2 a.c. no load voltage (U_{20}).....	20
7.3 d.c. no load voltage (U_{2d}).....	20
8 Maximum short circuit current	20
8.1 General.....	20
8.2 Spot and seam welding equipment.....	21
8.3 Projection welding equipment.....	21
8.4 Upset and flash welding equipment.....	22
9 Thermal rating	23
9.1 General.....	23
9.2 Thermal test.....	23
10 Cooling liquid circuit (liquid cooled welding equipment)	23
11 Static mechanical characteristics	24
11.1 General.....	24
11.2 Spot and projection welding equipment.....	24
11.2.1 General.....	24
11.2.2 Eccentricity.....	25
11.2.3 Angular deflection.....	26
11.2.4 Radial deflection.....	26
11.2.5 Axial deflection.....	27
11.2.6 Machine stiffness.....	27
11.2.7 Parallelism of top and bottom platen.....	27
11.2.8 Perpendicularity in platen movement, δ_4	28
11.3 Seam welding equipment.....	29
11.3.1 General.....	29
11.3.2 Eccentricity.....	29
11.3.3 Angular deflection.....	30
11.4 Upset welding equipment.....	30

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 44, *Welding and allied processes*, Subcommittee SC 6, *Resistance welding and allied mechanical joining*.

This third edition cancels and replaces the second edition (ISO 669:2000), which has been technically revised.
