Third edition
2019-04

Plastics — Determination of dynamic mechanical properties —

Part 2: Torsion-pendulum method

*Plastiques — Détermination des propriétés mécaniques
dynamiques —*

Partie 2: Méthode au pendule de torsion

Reference number

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	1
5 Test apparatus	3
5.1 Pendulum.....	3
5.2 Inertial element.....	3
5.2.1 General.....	3
5.2.2 Method A (see Figure 1).....	3
5.2.3 Method B (see Figure 2).....	3
5.3 Clamps.....	3
5.4 Oscillation-inducing device.....	4
5.5 Oscillation-frequency and oscillation-amplitude recording equipment.....	4
5.6 Temperature-controlled chamber.....	4
5.7 Gas supply.....	4
5.8 Temperature-measurement device.....	4
5.9 Devices for measuring test-specimen dimensions.....	4
6 Test specimens	4
6.1 General.....	4
6.2 Shape and dimensions.....	4
6.3 Preparation.....	5
7 Number of specimens	5
8 Conditioning	5
9 Procedure	5
9.1 Test atmosphere.....	5
9.2 Measurement of specimen cross-section.....	5
9.3 Mounting the test specimens.....	5
9.4 Varying the temperature.....	5
9.5 Performing the test.....	5
10 Expression of results	6
10.1 Symbols and correction factors.....	6
10.2 Calculation of logarithmic decrement, Δ	7
10.3 Calculation of torsional storage modulus, G'_{to}	8
10.4 Calculation of torsional loss modulus, G''_{to}	8
11 Precision	9
12 Test report	9
Annex A (normative) Influence of longitudinal force, W	10
Annex B (informative) Damping correction factor, F_d	11
Annex C (informative) Dimensional correction factor, F_c	12
Bibliography	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 5, *Physical-chemical properties*.

This third edition cancels and replaces the second edition (ISO 6721-2:2008), which has been technically revised. The main changes compared to the previous edition are as follows:

- the document has been revised editorially;
- normative references have been changed to undated.

A list of all parts in the ISO 6721 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
