First edition
2014-11-01

Heat-treatable steels, alloy steels and free-cutting steels —

Part 3: Case-hardening steels

*Aciers pour traitement thermique, aciers alliés et aciers pour
décolletage —*

Partie 3: Aciers pour cémentation

Reference number
ISO 683-3:2014(E)

8.1 Testing procedures and types of documents	7
8.2 Frequency of testing	7
8.3 Tests to be carried out for specific inspection	7
9 Test methods	8
9.1 Chemical analysis	8
9.2 Hardness and hardenability tests	8
9.3 Retests	8
10 Marking	8
Annex A (normative) Supplementary or special requirements	30
Annex B (informative) Designation of steels given in this part of ISO 683 and of comparable grades covered in various designation systems	32
Annex C (informative) Dimensional standards applicable to products complying with this part of ISO 683	34
Annex D (informative) Classification of steel grades according to minimum tensile strength as a function of diameter after hardening and tempering at 200 °C	35
Bibliography	36

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 17, *Steel*, Subcommittee SC 4, *Heat-treatable and alloy steels*.

This first edition cancels and replaces the second edition of (ISO 683-11:2012), which has been technically revised.

ISO 683 consists of the following parts, under the general title *Heat-treatable steels, alloy steels and free-cutting steels*:

- *Part 1: Non-alloy steels for quenching and tempering*
- *Part 2: Alloy steels for quenching and tempering*
- *Part 3: Case-hardening steels*
- *Part 4: Free-cutting steels*
- *Part 5: Nitriding steels*
- *Part 14: Hot-rolled steels for quenched and tempered springs*
- *Part 15: Valve steels for internal combustion engines*
- *Part 17: Ball and roller bearing steels*
- *Part 18: Bright steel products*
