

First edition
2023-11

Heat-treatable steels, alloy steels and free-cutting steels —

Part 7: Bright products of non-alloy and alloy steels

*Aciers pour traitement thermique, aciers alliés et aciers pour
décolletage —*

Partie 7: Produits en aciers non alliés et alliés transformés à froid

Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Classification and designation	3
4.1 Classification.....	3
4.2 Designation.....	3
5 Information to be supplied by the purchaser	3
5.1 Mandatory information.....	3
5.2 Options/Supplementary or special requirements.....	4
5.3 Ordering example.....	4
6 Manufacturing process	5
6.1 General.....	5
6.2 Treatment and surface condition at delivery.....	5
6.2.1 Treatment condition.....	5
6.2.2 Surface conditions.....	5
6.3 Traceability of the cast.....	5
7 Requirements	5
7.1 General.....	5
7.2 Chemical composition.....	5
7.3 Mechanical properties.....	6
7.4 Hardenability.....	6
7.5 Machinability.....	6
7.6 Grain size.....	7
7.7 Non-metallic inclusions.....	7
7.7.1 Microscopic inclusions.....	7
7.7.2 Macroscopic inclusions.....	7
7.8 Internal soundness.....	7
7.9 Decarburization.....	7
7.10 Shape, dimensions and tolerances.....	7
7.11 Surface quality.....	8
8 Inspection	8
8.1 Testing procedures and types of documents.....	8
8.2 Frequency of testing.....	9
8.3 Specific inspection and testing.....	10
8.3.1 Verification of the hardenability, hardness and mechanical properties.....	10
8.3.2 Visual and dimensional inspection.....	11
9 Test methods	11
9.1 Chemical analysis.....	11
9.2 Mechanical tests.....	11
9.2.1 Tensile test.....	11
9.2.2 Impact test.....	11
9.3 Hardness and hardenability tests.....	11
9.3.1 Hardness in treatment conditions +A and +FP.....	11
9.3.2 Verification of hardenability.....	12
9.4 Verification of dimensions.....	12
9.5 Retests.....	12
10 Marking	12
Annex A (informative) Steel grades and chemical composition according to ISO 630-2, ISO 683-1, ISO 683-2, ISO 683-3 and ISO 683-4	39

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 4, *Heat treatable and alloy steels*.

This first edition of ISO 683-7, together with ISO 16143-4, cancels and replaces ISO 683-18:2014, which has been technically revised.

The main changes are as follows:

- ISO 683-18 was split into ISO 683-7 for non-alloy and alloy steels and into ISO 16143-4 for stainless steels;
- definition for out-of-round was modified with two new definitions on ovality and out-of-shape;
- editorial revision.

A list of all parts in the ISO 683 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
