

ISO 7151

**Surgical instruments — Non-cutting,
articulated instruments — General
requirements and test methods**

*Instruments chirurgicaux — Instruments articulés, non
tranchants — Spécifications générales et méthodes d'essai*

**Third edition
2024-04**

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Material	1
5 Requirements	2
5.1 Heat, treatment and hardness for component parts, excluding rivets and screws and part manufactures of material grade i.....	2
5.1.1 Heat treatment.....	2
5.1.2 Hardness of instruments.....	2
5.1.3 Hardness of tungsten carbide inserts.....	2
5.2 Corrosion resistance.....	2
5.2.1 General.....	2
5.2.2 Test for resistance to copper sulfate.....	2
5.2.3 Test for resistance to boiling water.....	2
5.3 Workmanship.....	2
5.4 Surface condition.....	3
5.4.1 General.....	3
5.4.2 Surface finish.....	3
5.4.3 Passivation and final treatment.....	3
5.5 Elasticity.....	3
5.6 Function of needle holders.....	3
6 Test methods	3
6.1 Copper sulfate test.....	3
6.2 Boiling water test.....	4
6.3 Elasticity test for haemostatic forceps and needle holders.....	4
6.4 Function test of needle holders.....	4
7 Marking	4

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 170, *Surgical instruments*.

This third edition cancels and replaces the second edition (ISO 7151:1988), which has been technically revised.

The main changes are as follows:

- normative references updated;
- test methods for the determination of resistance against autoclaving, corrosion and thermal exposure updated to reference ISO 13402.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
