Road vehicles — Electrical/electronic switching devices —

Part 1:
Relays and flashers

Véhicules routiers — Dispositifs électriques/électroniques de commutation —
Partie 1: Relais et centrales clignotantes
Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 7588-1 was prepared by Technical Committee ISO/TC 22, Road vehicles, Subcommittee SC 3, Electrical and electronic equipment.

This first edition of ISO 7588-1 cancels and replaces ISO 7588:1983, which has been technically revised.

ISO 7588 consists of the following parts, under the general title Road vehicles — Electrical/electronic switching devices:

— Part 1: Relays and flashers
— Part 2: Electronic devices
— Part 3: Microrelays

Annexes A and B of this part of ISO 7588 are for information only.
