Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 General requirements	1
4 Nominal bore	1
5 Physical tests on finished hose	2
5.1 General	2
5.2 Test liquids	2
5.3 Bursting pressure	2
5.4 Vacuum-collapse test	3
5.5 Volume change in test liquids	3
5.6 Mass reduction of test hose	3
5.7 Fire resistance	3
5.8 Effect of ozone	3
5.9 Fuel permeation	3
5.10 Cold-flex test	4
5.11 Abrasion test — 38 mm and larger fuel-fill hose with helical wire embedded reinforcement	4
5.12 Dry heat resistance	4
5.13 Oil resistance test	4
5.14 Adhesion test	4
6 Marking	4
Annex A (normative) Fire test	6
Annex B (normative) Fuel permeation test (or equivalent test method)	8
Bibliography	10

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 188, *Small craft*.

This fourth edition cancels and replaces the third edition (ISO 7840:2004), which has been technically revised, mainly concerning test liquids in [5.2](#) to cover hoses' long-term resistance to petrol fuel mixed with ethanol as well as diesel fuel mixed with Fatty Acid Methyl Esters (FAME).
