About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 15 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: csc@iec.ch.

A propos de l'IEC

La Commission Electrotechnique Internationale (IEC) est la première organisation mondiale qui élabore et publie des Normes internationales pour tout ce qui a trait à l'électricité, à l'électronique et aux technologies apparentées.

A propos des publications IEC

Le contenu technique des publications IEC est constamment revu. Veuillez vous assurer que vous possédez l'édition la plus récente, un corrigendum ou amendement peut avoir été publié.

Catalogue IEC - webstore.iec.ch/catalogue

Application autonome pour consulter tous les renseignements bibliographiques sur les Normes internationales, Spécifications techniques, Rapports techniques et autres documents de l'IEC. Disponible pour PC, Mac OS, tablettes Android et iPad.

Recherche de publications IEC - www.iec.ch/searchpub

La recherche avancée permet de trouver des publications IEC en utilisant différents critères (numéro de référence, texte, comité d'études,...). Elle donne aussi des informations sur les projets et les publications remplacées ou retirées.

IEC Just Published - webstore.iec.ch/justpublished

Restez informé sur les nouvelles publications IEC. Just Published détaille les nouvelles publications parues. Disponible en ligne et aussi une fois par mois par email.

Electropedia - www.electropedia.org

Le premier dictionnaire en ligne de termes électroniques et électriques. Il contient 20 000 termes et définitions en anglais et en français, ainsi que les termes équivalents dans 15 langues additionnelles. Egalement appelé Vocabulaire Electrotechnique International (IEV) en ligne.

Glossaire IEC - std.iec.ch/glossary

65 000 entrées terminologiques électrotechniques, en anglais et en français, extraites des articles Termes et Définitions des publications IEC parues depuis 2002. Plus certaines entrées antérieures extraites des publications des CE 37, 77, 86 et CISPR de l'IEC.

Service Clients - webstore.iec.ch/csc

6	Requirements for equipment with Type of Protection control of ignition source “b”	19
6.1	General	19
6.2	Determination of the control parameters	19
6.2.1	General	19
6.2.2	Determination of the safety critical values	20
6.3	Ignition prevention system design and settings	20
6.3.1	Determining the performance requirements or operating characteristics	20
6.3.2	Instructions	20
6.3.3	System lockout	20
6.3.4	Operator intervention	21
6.4	Ignition protection of sensors and actuators	21
6.5	Ignition protection types	21
6.5.1	Ignition protection type b1	21
6.5.2	Ignition protection type b2	21
6.5.3	Application of ignition protection types	22
6.5.4	Requirements for ignition protection types	23
6.5.5	Programmable electronic devices	23
7	Requirements for equipment with Type of Protection liquid immersion “k”	23
7.1	Determination of the maximum / minimum criteria	23
7.2	Protective liquid	24
7.3	Equipment construction	24
7.3.1	General	24
7.3.2	Working angle	24
7.3.3	Measures to ensure effectiveness of liquid	24
7.3.4	Accidental loosening	25
7.3.5	Level monitoring	25
7.3.6	Loss of liquid	25
7.3.7	Open equipment	26
8	Type tests	26
8.1	Type tests for equipment with Type of Protection constructional safety “c”	26
8.2	Type tests for equipment with Type of Protection control of ignition source “b”	26
8.2.1	Determination of control parameters	26
8.2.2	Function and accuracy check of the ignition protection system	26
8.3	Type tests for equipment with Type of Protection liquid immersion “k”	26
8.3.1	General	26
8.3.2	Increased pressure test on enclosed equipment having a sealed enclosure that contains static, or flowing protective liquid	26
8.3.3	Overpressure test on enclosed equipment having a vented enclosure	26
9	Documentation	26
9.1	Documentation for equipment with Type of Protection constructional safety “c”	26
9.2	Documentation for equipment with Type of Protection control of ignition sources “b”	27
9.3	Documentation for equipment with Type of Protection liquid immersion “k”	27
10	Marking	28
10.1	General	28
10.2	Safety devices	28

Annex A (informative) Approach and application: equipment with Type of Protection “c”	29
A.1 General remarks regarding ignition hazard assessment.....	29
A.2 Stuffing box seal (see Table A.2)	29
A.3 Slide ring seal	31
A.4 Radial seal.....	36
A.5 Belt drives.....	40
Annex B (normative) Test requirements.....	42
B.1 "Dry run" type test for lubricated sealing arrangements	42
B.2 Type test for determining the maximum engaging time of clutch assembly	42
B.2.1 Apparatus	42
B.2.2 Procedure.....	43
Annex C (informative) Methodology: equipment with Type of Protection “b”	44
Annex D (informative) Approach to assign the required ignition protection type used for equipment to achieve different EPL	45
D.1 For EPL Gc and Dc	45
D.2 For EPL Gb and Db	45
D.3 For EPL Mb.....	45
D.4 For EPL Ga and Da	46
Annex E (informative) Information on functional safety concept.....	47
E.1 ISO 13849-1	47
E.2 IEC 61508-1.....	47
E.3 IEC 62061.....	47
E.4 Reliability according to functional safety standards	47
Bibliography	49

INTERNATIONAL ELECTROTECHNICAL COMMISSION

EXPLOSIVE ATMOSPHERES –

Part 37: Non-electrical equipment for explosive atmospheres – Non electrical type of protection constructional safety “c”, control of ignition source “b”, liquid immersion “k”

FOREWORD

- 1) The International Electrotechnical Commission (IEC) is a worldwide organization for standardization comprising all national electrotechnical committees (IEC National Committees). The object of IEC is to promote international co-operation on all questions concerning standardization in the electrical and electronic fields. To this end and in addition to other activities, IEC publishes International Standards, Technical Specifications, Technical Reports, Publicly Available Specifications (PAS) and Guides (hereafter referred to as “IEC Publication(s)”). Their preparation is entrusted to technical committees; any IEC National Committee interested in the subject dealt with may participate in this preparatory work. International, governmental and non-governmental organizations liaising with the IEC also participate in this preparation. IEC collaborates closely with the International Organization for Standardization (ISO) in accordance with conditions determined by agreement between the two organizations.
- 2) The formal decisions or agreements of IEC on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees.
- 3) IEC Publications have the form of recommendations for international use and are accepted by IEC National Committees in that sense. While all reasonable efforts are made to ensure that the technical content of IEC Publications is accurate, IEC cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees undertake to apply IEC Publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC Publication and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC itself does not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. IEC is not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or its directors, employees, servants or agents including individual experts and members of its technical committees and IEC National Committees for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this IEC Publication or any other IEC Publications.
- 8) Attention is drawn to the Normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this IEC Publication may be the subject of patent rights. IEC shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 80079-37 has been prepared by IEC sub-committee 31M: Non-electrical equipment and protective systems for explosive atmospheres, of IEC 31: Equipment for explosive atmospheres.

The text of this standard is based on the following documents of the IEC:

FDIS	Report on voting
31M/104/FDIS	31M/110/RVD

Full information on the voting for the approval of this standard can be found in the report on voting indicated in the above table. In ISO, the standard has been approved by 15 P members out of 20 having cast a vote.

This is a preview of "ISO 80079-37:2016". [Click here to purchase the full version from the ANSI store.](#)

This publication has been drafted in accordance with the ISO/IEC Directives, Part 2.

"A list of all parts in the IEC 60079 series, under the general title *Explosive atmospheres*, as well as the International Standard 80079 series, can be found on the IEC website."

The committee has decided that the contents of this publication will remain unchanged until the stability date indicated on the IEC web site under "<http://webstore.iec.ch>" in the data related to the specific publication. At this date, the publication will be

- reconfirmed,
- withdrawn,
- replaced by a revised edition, or
- amended.
