<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative reference</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 General requirements</b> .....	<b>2</b>
<b>5 Materials</b> .....	<b>3</b>
<b>6 Plumbing system</b> .....	<b>3</b>
6.1 Hoses and piping.....	3
6.2 Seacock fitting.....	3
<b>7 Vent system</b> .....	<b>3</b>
7.1 Venting of gases.....	3
7.1.1 Heel angles.....	3
7.1.2 Inside diameter of fittings.....	3
7.1.3 Prevention of clogging — Pressure resistance.....	4
7.1.4 Flow area.....	4
7.2 Venting of tanks.....	4
7.2.1 Rigid tanks with capacity of less than 400 l.....	4
7.2.2 Rigid tanks with capacity of 400 l and greater.....	4
7.2.3 Venting of flexible tanks.....	4
<b>8 Holding tanks</b> .....	<b>4</b>
8.1 General requirements.....	4
8.1.1 Fastening.....	4
8.1.2 Indication of contents level.....	4
8.1.3 Accessibility of fittings and connections.....	4
8.1.4 Access opening.....	5
8.1.5 Tank walls.....	5
8.2 Requirements for permanently installed holding tanks.....	5
8.3 Requirements for portable holding tanks.....	5
<b>9 Pump-out fitting</b> .....	<b>5</b>
<b>10 Identification</b> .....	<b>6</b>
<b>11 Information for owner's manual</b> .....	<b>6</b>
<b>Annex A (normative) Nominal design of pump-out fitting</b> .....	<b>7</b>
<b>Annex B (informative) Typical installations for toilet retention systems</b> .....	<b>9</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 188, *Small craft*.

This first edition cancels and replaces ISO 8099:2000, which has been technically revised.

The main changes compared to the previous edition are in 4.1, 4.2, 4.9 and 9.4.

A list of all parts in the ISO 8099 series can be found on the ISO website.
