Foreword.....	iv
1 Scope.....	1
2 Normative references	1
3 Terms and definitions	2
4 Principle	2
5 Apparatus.....	3
5.1 Test machine	3
5.2 Pendulum and striker	3
5.3 Crosshead.....	3
5.4 Clamping devices/jaws.....	3
5.5 Micrometers and gauges.....	3
6 Test specimens	4
6.1 Shape and dimensions	4
6.2 Preparation	6
6.3 Notching of specimens.....	6
6.4 Number of test specimens	6
6.5 Anisotropy	6
6.6 Conditioning	7
7 Procedure.....	7
8 Determination of energy corrections	8
8.1 Method A — Correction E_q due to the plastic deformation and the kinetic energy of the crosshead	8
8.2 Method B — Crosshead-bounce energy E_b	8
9 Calculation and expression of results	8
9.1 Calculation of corrected tensile-impact energy.....	8
9.2 Calculation of tensile-impact strength.....	9
9.3 Statistical parameters	9
9.4 Number of significant figures	9
10 Precision	9
11 Test report.....	10
Annex A (normative) Determination of correction factor for method A	11
Annex B (normative) Determination of bounce-correction factor for method B	14

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 8256 was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 2, *Mechanical properties*.

This second edition cancels and replaces the first edition (ISO 8256:1990), which has been technically revised.
