Contents

	Page
Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Principle	2
5 Apparatus	2
5.1 Test machine.....	2
5.2 Pendulum and striker.....	2
5.3 Crosshead.....	3
5.4 Clamping devices/jaws.....	3
5.5 Micrometers and gauges.....	3
6 Test specimens	3
6.1 Shape and dimensions.....	3
6.2 Preparation.....	5
6.2.1 Moulding and extrusion compounds.....	5
6.2.2 Sheets.....	6
6.2.3 Fibre-reinforced resins.....	6
6.3 Notching of specimens.....	6
6.4 Number of test specimens.....	6
6.5 Anisotropy.....	6
6.6 Conditioning.....	7
7 Procedure	7
8 Determination of energy corrections	8
8.1 Method A — Correction E_q due to the plastic deformation and the kinetic energy of the crosshead.....	8
8.2 Method B — Crosshead-bounce energy E_b	8
9 Calculation and expression of results	8
9.1 Calculation of corrected tensile-impact energy.....	8
9.1.1 General.....	8
9.1.2 Energy correction for method A.....	8
9.1.3 Energy correction for method B.....	9
9.2 Calculation of tensile-impact strength.....	9
9.3 Statistical parameters.....	9
9.4 Number of significant figures.....	9
10 Precision	9
11 Test report	10
Annex A (normative) Determination of correction factor for method A	11
Annex B (normative) Determination of bounce-correction factor for method B	14
Bibliography	16

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 2, *Mechanical behaviour*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 249, *Plastics*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 8256:2004), which has been technically revised.

The main changes are as follows:

- the reference to ISO 3167 has been replaced with ISO 20753;
- [Table 2](#) has been modified clarified;
- additional description on preparation methods for the specimen types in [6.2.1](#) has been given.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
