## Rubber compounding ingredients — Stearic acid — Definition and test methods

*Ingrédients de mélange du caoutchouc — Acide stéarique — Définition et méthodes d'essai*

Reference number  
ISO 8312:1999(E)

## Contents

<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Term and definition</b> .....	<b>2</b>
<b>4 Sampling</b> .....	<b>2</b>
<b>5 Physical and chemical properties</b> .....	<b>2</b>
<b>6 Test report</b> .....	<b>3</b>
<b>Annex A (normative) Determination of ash at 550 °C ± 25 °C</b> .....	<b>4</b>
<b>Annex B (normative) Determination of copper content — Atomic absorption spectrometric method</b> .....	<b>6</b>
<b>Annex C (normative) Determination of manganese content — Atomic absorption spectrometric method</b> .....	<b>8</b>
<b>Annex D (normative) Determination of iron content — Atomic absorption spectrometric method</b> .....	<b>10</b>
<b>Annex E (normative) Determination of nickel content — Atomic absorption spectrometric method</b> .....	<b>12</b>
<b>Annex F (normative) Determination of mineral acidity — Titrimetric method</b> .....	<b>14</b>
<b>Annex G (normative) Determination of copper content — Molecular absorption spectrometric method</b> .....	<b>16</b>
<b>Annex H (normative) Determination of manganese content — Molecular absorption spectrometric method</b> .....	<b>17</b>
<b>Annex J (normative) Determination of iron content — Molecular absorption spectrometric method</b> .....	<b>18</b>
<b>Annex K (normative) Determination of nickel content — Molecular absorption spectrometric method</b> .....	<b>19</b>
<b>Annex L (informative) Classification of stearic and stearic acid/palmitic acid blends and typical physical and chemical properties</b> .....	<b>20</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 8312 was prepared by Technical Committee ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 3, *Raw materials (including latex) for use in the rubber industry*.

It cancels and replaces ISO 8312-1:1988, which has been technically revised.

Annexes A to K form a normative part of this International Standard. Annex L is for information only.
