## Rubber compounding ingredients — Stearic acid — Definition and test methods

*Ingrédients de mélange du caoutchouc — Acide stéarique —  
Définition et méthodes d'essai*

Foreword.....	iv
<b>1 Scope.....</b>	<b>1</b>
<b>2 Normative references.....</b>	<b>1</b>
<b>3 Terms and definitions.....</b>	<b>2</b>
<b>4 Sampling.....</b>	<b>2</b>
<b>5 Physical and chemical properties.....</b>	<b>2</b>
<b>6 Test report.....</b>	<b>2</b>
<b>Annex A (normative) Determination of ash at 550 °C ± 25 °C.....</b>	<b>4</b>
<b>Annex B (normative) Determination of copper content — Atomic absorption spectrometric method.....</b>	<b>6</b>
<b>Annex C (normative) Determination of manganese content — Atomic absorption spectrometric method.....</b>	<b>8</b>
<b>Annex D (normative) Determination of iron content — Atomic absorption spectrometric method.....</b>	<b>10</b>
<b>Annex E (normative) Determination of nickel content — Atomic absorption spectrometric method.....</b>	<b>12</b>
<b>Annex F (normative) Determination of mineral acidity — Titrimetric method.....</b>	<b>14</b>
<b>Annex G (normative) Determination of copper content — Molecular absorption spectrometric method.....</b>	<b>16</b>
<b>Annex H (normative) Determination of manganese content — Molecular absorption spectrometric method.....</b>	<b>17</b>
<b>Annex J (normative) Determination of iron content — Molecular absorption spectrometric method.....</b>	<b>18</b>
<b>Annex K (normative) Determination of nickel content — Molecular absorption spectrometric method.....</b>	<b>19</b>
<b>Annex L (normative) Classification of stearic and stearic acid/palmitic acid blends and typical physical and chemical properties.....</b>	<b>20</b>
<b>Bibliography.....</b>	<b>22</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 45, *Rubber and rubber products*, Subcommittee SC 3, *Raw materials (including latex) for use in the rubber industry*.

This second edition cancels and replaces the first edition (ISO 8312:1999), of which it constitutes a minor revision with the following changes:

- atomic absorption spectrometric method is stated as the preferred method in the Scope;
- Normative references in [Clause 2](#) were updated and a Bibliography was added.
