Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Specifications of free space area	2
4.1 Length of free space area (l_z)	2
4.2 Width of the free space area (b_z)	2
5 Geometrical requirements of free space area	3
5.1 Longitudinal profile of the ski surface within the free space area	3
5.2 Transverse profile of the ski surface within the free space area	3
6 Specifications of binding mounting area	4
6.1 Length of binding mounting area (l_b)	4
6.2 Width of binding mounting area	4
6.3 Minimum thickness of binding mounting area	4
7 Strength requirements of binding mounting area	5
7.1 Screw retention strength (F_r)	5
7.2 Stripping resistance (F_s)	5
8 Specifications of the binding	5
8.1 General	5
8.2 Centre-to-centre distances for binding mounting screws	5
8.2.1 Maximum centre-to-centre distance	5
8.2.2 Minimum centre-to-centre distance	6
8.3 Penetration depth of binding screws	6
9 Side walls	6
10 Marking	6
10.1 Marking of the mounting point	6
10.2 Marking of the ski properties	6
11 Apparatus	6
12 Test screws	8
13 Test methods	8
13.1 Sampling and conditioning	8
13.2 General requirements	8
13.3 Retention strength test	9
13.3.1 Mounting of the attachment plate	9
13.3.2 Positioning of the pull-out tests within the binding mounting area	10
13.3.3 Load application	11
13.4 Stripping resistance test	11
14 Test report	11
Annex A (informative) Synoptic tables	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 83, *Sports and other recreational facilities and equipment*, Subcommittee SC 04, *Snowsports equipment*.

This fifth edition cancels and replaces the fourth edition (ISO 8364:2007), which has been technically revised.
