Second edition
2007-08-01

Bonded abrasives — Determination and designation of grain size distribution —

Part 2:

Microgrits F230 to F2000

Abrasifs agglomérés — Détermination et désignation de la distribution granulométrique —

Partie 2: Micrograins F230 à F2000

Reference number

Annex B (informative) Form for recording results of sedimentation analysis of microgrits of F series using US sedimentation tube.....	31
Annex C (informative) Example of presentation of test data for grain size distribution of fused aluminium oxide.....	32

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 8486-2 was prepared by Technical Committee ISO/TC 29, *Small tools*, Subcommittee SC 5, *Grinding wheels and abrasives*.

This second edition cancels and replaces the first edition (ISO 8486-2:1996), which has been technically revised.

ISO 8486 consists of the following parts, under the general title *Bonded abrasives — Determination and designation of grain size distribution*:

- *Part 1: Macrogrits F4 to F220*
- *Part 2: Microgrits F230 to F2000*
