Third edition
2018-07

Reciprocating internal combustion engine driven alternating current generating sets —

Part 2: Engines

*Groupes électrogènes à courant alternatif entraînés par moteurs
alternatifs à combustion interne —*

Partie 2: Moteurs

Reference number
ISO 8528-2:2018(E)

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms, symbols, and definitions	1
4 Other regulations and additional requirements	7
5 General characteristics	8
5.1 Power characteristics.....	8
5.1.1 General.....	8
5.1.2 ISO standard power.....	8
5.1.3 Service power.....	8
5.2 Main characteristics of the RIC engine.....	8
5.3 Low-load operation.....	9
6 Speed characteristics	9
6.1 General.....	9
6.2 Types of speed governor used for generating sets.....	9
6.2.1 Proportional (P) governor.....	9
6.2.2 Proportional Integral (PI) governor.....	9
6.2.3 Proportional Integral Differential (PID) governor.....	9
6.3 Use of speed governor.....	10
6.3.1 General.....	10
6.3.2 Single operation.....	10
6.3.3 Parallel operation.....	10
7 RIC engine load acceptance	10
7.1 General.....	10
7.2 Non-turbocharged RIC engines.....	10
7.3 Turbocharged RIC engines.....	10
8 Vibration and noise	11
8.1 Torsional vibration.....	11
8.2 Linear vibration.....	11
8.3 Noise.....	11
9 Heat balance	11
10 Inlet and exhaust system	11
11 Starting ability	11
12 Fuel, lubricants and coolants	12
13 Governing system values	12
Bibliography	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 70, *Internal combustion engines*.

This third edition cancels and replaces the second edition (ISO 8528-2:2005), of which it constitutes a minor revision.

The main changes compared to the previous edition are as follows:

- the normative references have been updated;
- editorial changes have been made.

A list of all parts in ISO 8528 series can be found on the ISO website.
