Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Atmosphere for conditioning and testing	2
5 Number of specimens	2
6 Determination of total mass per unit area	2
6.1 General.....	2
6.2 Principle.....	2
6.3 Apparatus.....	2
6.4 Specimens.....	2
6.5 Preparation of specimens.....	3
6.6 Procedure.....	3
6.7 Expression of results.....	3
6.8 Test report.....	3
7 Determination of total pile mass per unit area	3
7.1 General.....	3
7.2 Principle.....	4
7.3 Apparatus.....	4
7.4 Specimens.....	4
7.5 Procedure.....	4
7.5.1 Textile floor covering.....	4
7.5.2 Artificial turf.....	4
7.6 Expression of results.....	5
7.6.1 For textile floor coverings.....	5
7.6.2 For artificial turf.....	5
7.7 Test report.....	5
8 Determination of mass of pile per unit area above the substrate	6
8.1 General.....	6
8.2 Principle.....	6
8.3 Apparatus.....	6
8.4 Specimens.....	6
8.5 Preparation of specimens.....	6
8.6 Procedure.....	6
8.7 Expression of results.....	7
8.8 Test report.....	7
9 Calculation of measured surface pile density and measured pile fibre volume ratio	8
9.1 General.....	8
9.2 Principle.....	8
9.3 Apparatus.....	8
9.4 Specimens.....	8
9.5 Preparation of specimens.....	8
9.6 Procedure.....	8
9.7 Expression of results.....	8
9.8 Test report.....	10

This is a preview of ISO 8543:2020. Click [here](#) to purchase the full version from the ANSI store.

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 219, *Floor coverings*.

This third edition cancels and replaces the second edition (ISO 8543:1998), which has been technically revised.

The main changes compared to the previous edition are as follows:

- clarification of method in the case of artificial turf products.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

This corrected version of ISO 8543:2020 incorporates the following corrections:

- correction of text in [Clause 5](#);
- correction of reading resolution and precision in [6.3.3](#);
- correction of reading resolution and precision in [7.5.2](#);
- correction of variables table in [7.6.2](#).
