Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	2
5 Reagents and media	2
6 Apparatus	4
7 Procedure	5
7.1 Preparation of growth medium	5
7.2 Preparation of pre-culture and inoculum	5
7.3 Choice of test sample concentrations	5
7.4 Preparation of test sample and stock solutions	5
7.5 Preparation of test and control batches	6
7.6 Incubation	6
7.7 Measurements	7
8 Validity criteria	7
9 Calculation	7
9.1 Plotting of growth curves	7
9.2 Calculation of percentage inhibition	8
9.3 Determination of E_rC_x (e.g. E_rC_{10} and E_rC_{50})	8
10 Expression of results	8
11 Interpretation of results	9
12 Precision	9
13 Test report	9
Annex A (informative) Rapid screening of waste water algal growth inhibition	11
Annex B (informative) Test procedure with algae from algal beads, with direct measurement of algal growth in spectrophotometric cells	14
Annex C (informative) Procedure for immobilization of algae in alginate beads	19
Bibliography	21

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 8692 was prepared by Technical Committee ISO/TC 147, *Water quality*, Subcommittee SC 5, *Biological methods*.

This third edition cancels and replaces the second edition (ISO 8692:2004), which has been technically revised.
