

ISO 877-3

Plastics — Methods of exposure to solar radiation —

Part 3: Intensified weathering using concentrated solar radiation

Plastiques — Méthodes d'exposition au rayonnement solaire —

*Partie 3: Exposition intensifiée par rayonnement solaire
concentré*

Third edition

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Principle	1
5 Apparatus	2
5.1 General requirements	2
5.2 Apparatus for measurement of climatic factors	3
6 Test specimens	3
7 Exposure conditions	4
7.1 Orientation of mirrors	4
7.2 Exposure site	4
7.3 Temperature control	4
7.4 Irradiance level	5
8 Exposure stages	6
8.1 General	6
8.2 Solar radiant exposure	6
8.2.1 Guidance for selection of the exposure stage	6
8.2.2 Instrumental measurement of solar radiant exposure	6
9 Procedure	7
9.1 Mounting of test specimens	7
9.2 Mounting of reference materials (if used)	7
9.3 Climatic observations	7
9.4 Exposure of test specimens	7
9.4.1 General	7
9.4.2 Exposure cycles	7
9.4.3 Testing under glass	7
10 Expression of results	8
10.1 Determination of changes in properties	8
10.2 Climatic conditions and observations	8
10.2.1 General	8
10.2.2 Temperature	8
10.2.3 Relative humidity	8
10.2.4 Levels (values) of exposure stages	8
10.2.5 Radiation measurement	9
10.2.6 Precipitation	9
10.2.7 Time of wetness	9
10.2.8 Other observations	9
11 Test report	9
Bibliography	10

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

ISO draws attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO takes no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO had received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents. ISO shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 61, *Plastics*, Subcommittee SC 6, *Ageing, chemical and environmental resistance*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 249, *Plastics*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This third edition cancels and replaces the second edition (ISO 877-3:2018), which has been technically revised.

The main changes are as follows:

- size requirements in [7.3](#) have been added;
- in [10.2.4](#), a second formula has been added;
- a new [10.2.5](#) “Radiation measurement” has been added and subsequent clauses have been renumbered.

A list of all parts in the ISO 877 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
