<b>Foreword</b> .....	<b>iv</b>
<b>1 Scope</b> .....	<b>1</b>
<b>2 Normative references</b> .....	<b>1</b>
<b>3 Terms and definitions</b> .....	<b>1</b>
<b>4 Classification</b> .....	<b>1</b>
<b>5 Requirements</b> .....	<b>2</b>
5.1 Reference temperature.....	2
5.2 Optical requirements.....	2
5.2.1 General.....	2
5.2.2 Back vertex power of power-variation lenses at the primary reference point.....	2
5.2.3 Direction of the cylinder axis.....	2
5.2.4 Variation power (including addition power).....	3
5.2.5 Prismatic power.....	3
5.2.6 Prism base setting.....	3
5.3 Requirements for size and thickness.....	4
5.4 Orientation requirement for polarizing lenses.....	4
<b>6 Verification methods</b> .....	<b>4</b>
6.1 General.....	4
6.2 Verification method for back vertex power.....	4
6.3 Verification method for the direction of the cylinder axis.....	5
6.4 Verification method for prismatic power.....	5
6.5 Verification method for variation power (including addition power).....	5
6.5.1 General.....	5
6.5.2 Procedure.....	5
6.6 Inspection method for material and surface quality.....	5
<b>7 Marking</b> .....	<b>5</b>
7.1 Permanent marking.....	5
7.2 Optional non-permanent marking.....	6
<b>8 Identification and information</b> .....	<b>6</b>
<b>9 Reference to this document</b> .....	<b>6</b>

<b>Bibliography</b> .....	<b>8</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html)

This document was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 7, *Ophthalmic optics and instruments*.

This third edition cancels and replaces the second edition (ISO 8980-2:2004), which has been technically revised. It also incorporates the Technical Corrigendum ISO 8980-2:2004/Cor.1:2006.

A list of all parts in the ISO 8980 series can be found on the ISO website.
