Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General test requirements	1
4.1 Preliminary preparation.....	1
4.2 Application of forces.....	2
4.3 Tolerances.....	2
5 Test apparatus	2
5.1 General.....	2
5.2 Test probes.....	2
5.2.1 Finger probes with hemispherical end.....	2
5.2.2 Shape assessment probe.....	3
5.2.3 Other probes.....	3
5.3 Bed base impactor.....	4
5.3.1 Circular body.....	4
5.3.2 Springs.....	5
5.3.3 Striking surface.....	5
5.4 Loading pads.....	5
5.5 Test mattress.....	5
5.5.1 General.....	5
5.5.2 Usage.....	6
5.6 Test mass.....	6
5.7 Stops.....	6
5.8 Floor surface.....	6
5.9 Tread impactor.....	6
5.10 Template for V-shaped openings.....	7
5.11 Foam.....	8
6 Test procedures	8
6.1 Inspection before testing.....	8
6.2 Inspection of product.....	8
6.3 Measurement.....	9
6.3.1 Holes, gaps and openings.....	9
6.3.2 V and irregular shaped holes, gaps and openings.....	9
6.4 Strength and durability tests.....	11
6.4.1 Positioning of the bed.....	11
6.4.2 Test of bed base and safety barrier.....	11
6.4.3 Test of the safety barriers around bed.....	13
6.4.4 Durability test of frame and fastenings.....	14
6.4.5 Test of means of access.....	15
6.4.6 Test of platforms, and platform barriers.....	17
6.5 Stability test.....	18
6.6 Fastening of the upper bed to the lower bed.....	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by ISO/TC 136, *Furniture*.

This second edition cancels and replaces the first edition (ISO 9098-2:1994), which has been technically revised.

The main changes are as follows:

- modification of the title;
- expansion of the scope;
- increase of apparatus and test procedures;
- revision of general test requirements and test report.

A list of all parts in the ISO 9098 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
