Second edition
2016-02-15

Aerospace — Bolts, with MJ threads, made of heat-resistant nickel-based alloy, strength class 1 550 MPa — Procurement specification

*Aéronautique et espace — Vis à filetage MJ, en alliage résistant
à chaud à base de nickel, classe de résistance 1 550 MPa —
Spécification d'approvisionnement*

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Quality assurance	3
4.1 General	3
4.1.1 Approval of manufacturers	3
4.1.2 Qualification of bolts	3
4.1.3 Acceptance of bolts	3
4.2 Qualification inspection conditions	3
4.3 Acceptance inspection conditions	4
4.4 Use of "statistical process control (SPC)"	4
5 Requirements	5
Annex A (normative) Passivation treatment	20
Annex B (informative) Cross-sectional areas and formulae for tensile, tension fatigue and stress rupture loads	21
Annex C (informative) Cross-sectional areas and formulae for double shear loads	23
Bibliography	25

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 20, *Aircraft and space vehicles*, Subcommittee SC 4, *Aerospace fastener systems*.

This second edition cancels and replaces the first edition (ISO 9154:1999), which has been technically revised.

Annex A forms a normative part of this International Standard. Annexes B and C are for information only.
