Fourth edition
2022-03

Optics and photonics — Optical coatings —

Part 4: Specific test methods: abrasion, adhesion and resistance to water

Optique et photonique — Traitements optiques —

Partie 4: Méthodes d'essai spécifiques: abrasion, adhérence et résistance à l'eau

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Preparation prior to testing	1
5 Abrasion tests: cheesecloth/eraser test (conditioning method 01)	2
5.1 General.....	2
5.2 Test conditions.....	2
5.2.1 General.....	2
5.2.2 Moderate abrasion test.....	2
5.2.3 Severe abrasion test.....	2
5.3 Degree of severity: abrasion – cheesecloth/eraser test (conditioning method 01).....	2
5.4 Recovery.....	3
5.5 Evaluation.....	3
6 Adhesion test: tape test (conditioning method 02)	3
6.1 General.....	3
6.2 Test conditions.....	3
6.3 Degree of severity: adhesion – tape test (conditioning method 02).....	3
6.4 Recovery.....	4
6.5 Evaluation.....	4
7 Adhesion test: crosshatch test (conditioning method 03)	4
7.1 General.....	4
7.2 Test conditions.....	4
7.3 Degree of severity.....	4
7.4 Conditioning.....	4
7.5 Recovery.....	5
7.6 Evaluation.....	5
8 Resistance to water: exposure to water (conditioning method 04)	5
8.1 General.....	5
8.2 Test conditions.....	5
8.3 Degree of severity: resistance to water – exposure to water (conditioning method 04).....	6
8.4 Recovery.....	6
8.5 Evaluation.....	6
9 Adhesion test: pull-off test (conditioning method 05)	7
9.1 General.....	7
9.2 Test conditions.....	7
9.3 Degree of severity: adhesion – pull-of test (conditioning method 05).....	8
9.4 Evaluation.....	8
10 Environmental test code	8
Annex A (normative) Materials for abrasion testing of optical coatings	9
Annex B (informative) Cheesecloth pad, pad cover and fixture preparation for moderate abrasion testing of optical coatings	12
Annex C (normative) Visual examination of optical coatings	14
Bibliography	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 3, *Optical materials and components*.

This fourth edition cancels and replaces the third edition (ISO 9211-4:2012), which has been technically revised.

The main changes are as follows:

- Addition of a new adhesion test method (pull-off test).

A list of all parts in the ISO 9211 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
