## **Ergonomic requirements for the design of displays and control actuators —**

### **Part 1:**

### **Human interactions with displays and control actuators**

*Spécifications ergonomiques pour la conception des dispositifs  
de signalisation et des organes de service —*

*Partie 1: Interactions entre l'homme et les dispositifs de signalisation  
et organes de service*

Reference number  
ISO 9355-1:1999(E)

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

International Standard ISO 9355-1 was prepared by the European Committee for Standardization (as European Standard EN 894-1:1997) and was adopted, under a special "fast-track procedure" by Technical Committee ISO/TC 159, *Ergonomics*, Subcommittee SC 4, *Ergonomics of human-system interaction*, in parallel with its approval by the ISO member bodies.

ISO 9355 consists of the following parts, under the general title *Ergonomic requirements for the design of displays and control actuators*:

- *Part 1: Human interactions with displays and control actuators*
- *Part 2: Displays*
- *Part 3: Control actuators*
- *Part 4: Location and arrangement of displays and control actuators*

Annex A of this part of ISO 9355 is for information only.
