First edition
2009-03-01

Continuously cold-rolled stainless steel — Tolerances on dimensions and form —

Part 2: Wide strip and plate/sheet

Acier inoxydable laminé à froid en continu — Tolérances sur les dimensions et la forme —

Partie 2: Grandes bandes et tôles

Reference number

Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions.....	1
4 Information to be supplied by the purchaser	1
5 Type of delivery and delivery condition	2
6 Preferred thicknesses	3
7 Tolerances on thickness for cold-rolled wide strip and products obtained from cold-rolled wide strip	3
8 Tolerances on width for cold-rolled wide strip and products obtained from cold-rolled wide strip	4
9 Preferred coil inner diameters for cold-rolled wide strip and slit cold-rolled wide strip	5
10 Tolerances on length for plate/sheet cut from cold-rolled wide strip and for cut lengths obtained from slit cold-rolled wide strip	5
11 Tolerances on edge camber for cold-rolled wide strip and products obtained from cold-rolled wide strip	6
12 Tolerances on squareness for plate/sheet obtained from cold-rolled wide strip and cut lengths obtained from slit cold-rolled wide strip	6
13 Tolerances on flatness for plate/sheet obtained from cold-rolled wide strip and cut lengths obtained from slit cold-rolled wide strip	6
14 Edge waviness tolerances for cold-rolled strip.....	7
15 Form of coils	7
16 Ordered format for plate/sheet and cut lengths	7
17 Measurement of thickness for cold-rolled wide strip, plate/sheet cut from cold-rolled wide strip, slit cold-rolled wide strip and cut lengths obtained from slit cold-rolled wide strip	7
18 Measurement of width.....	8
19 Measurement of length.....	8
20 Measurement of edge camber	8
21 Measurement of squareness	9
22 Measurement of flatness and waviness	9

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 9445-2 was prepared by Technical Committee ISO/TC 17, *Steel*, Subcommittee SC 4, *Heat treatable and alloy steels*.

This first edition of ISO 9445-2, together with ISO 9445-1, cancels and replaces ISO 9445:2002, the contents of which have been technically revised and separated into two parts.

ISO 9445 consists of the following parts, under the general title *Continuously cold-rolled stainless steel — Tolerances on dimensions and form*:

- *Part 1: Narrow strip and cut lengths*
- *Part 2: Wide strip and plate/sheet*
