Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Test conditions	3
4.1 Loading rate.....	3
4.2 Accuracy of measurement.....	4
4.3 Test sole.....	4
4.4 Test ski.....	4
5 Test methods A and B	4
5.1 Principle.....	4
5.2 Simple torsion test.....	4
5.3 Forward bending test.....	6
6 Requirements and testing	7
6.1 General requirements.....	7
6.2 Release tests — Setting, reproducibility, and symmetry of release values.....	9
6.3 Evaluation of reproducibility of release under different influences.....	10
6.4 Energy absorption (recentering).....	16
6.5 Lateral release under impact loading.....	16
6.6 Field tests.....	16
6.7 Exposure to corrosion and dirt.....	18
7 Marking	18
Annex A (informative) Additional information to conduct tests according to test method A	20
Annex B (informative) Fixtures and load configurations necessary for conducting tests using test method B	25
Annex C (normative) Grain size distribution of dirt	32
Annex D (informative) Determination of tolerances on M_z and M_y	33

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 83, *Sports and recreational equipment*, Subcommittee SC 4, *Snowsports equipment*.

This fourth edition cancels and replaces the third edition (ISO 9462:2006 and ISO 9462:2006/Amd.1:2009), which has been technically revised with the following changes:

- [Clause 3](#) new definitions [3.5](#), [3.6](#) and [3.7](#);
- deletion of Table 1 "Test ski characteristics";
- modification of [5.1](#);
- addition of new [6.3.3](#) "Release with ski deflection";
- new [Table 3](#) "Deflection of ski";
- addition of new [6.3.4](#) "Release under combined loading";
- in [6.6.2](#) deletion of ski lengths;
- addition of new [Clause 7](#) "Marking";
- addition of new informative [Annex A](#) "Additional information to conduct tests according to test method A";
- addition of new informative [Annex B](#) "Fixtures and load configurations necessary for conducting tests using test method B".
