Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Classification	2
4.1 According to type of protection against electric shock.....	2
4.2 According to mode of operation.....	2
5 Requirements and recommendations	2
5.1 General requirements.....	2
5.2 Optical requirements.....	3
5.2.1 Adjustable level of illuminance.....	3
5.2.2 Illumination pattern.....	3
5.2.3 Illuminance in patient's eyes.....	4
5.2.4 Chromatic uniformity.....	5
5.2.5 Correlated colour temperature.....	5
5.2.6 Shadow.....	6
5.2.7 Colour fidelity.....	6
5.2.8 Actinic UV hazard exposure for the skin and eye.....	6
5.2.9 Near-UV hazard exposure for the eye.....	6
5.2.10 Retinal blue light hazard exposure.....	7
5.2.11 Single fault condition for photobiological safety.....	7
5.2.12 Heat due to optical radiation.....	7
5.2.13 Compatibility with light-activated restorative materials.....	7
5.3 Mechanical requirements.....	7
5.3.1 Moving parts.....	7
5.3.2 Operating controls.....	7
5.3.3 Rotary movement.....	8
5.3.4 Handling and mechanical adjustment.....	8
5.3.5 Expelled parts.....	8
5.4 Reprocessing.....	8
5.5 Electrical requirements.....	8
5.6 Usability.....	8
6 Sampling	9
7 Testing	9
7.1 General.....	9
7.2 Visual inspection.....	9
7.3 Optical tests.....	9
7.3.1 Test set-up.....	9
7.3.2 Level of illuminance and illuminance pattern.....	9
7.3.3 Illuminance uniformity.....	10
7.3.4 Illuminance in the patient's eyes.....	10
7.3.5 Chromatic uniformity.....	10
7.3.6 Correlated colour temperature.....	11
7.3.7 Shadow.....	11
7.3.8 Colour fidelity.....	12
7.3.9 Actinic UV hazard exposure for the skin and eye.....	12
7.3.10 Near-UV hazard exposure for the eye.....	12
7.3.11 Retinal blue light hazard exposure.....	13
7.3.12 Heat due to optical radiation.....	14
7.3.13 Compatibility with light-activated restorative materials.....	14
7.4 Mechanical tests.....	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 106, *Dentistry*, Subcommittee SC 6, *Dental equipment*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 55, *Dentistry*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This fourth edition cancels and replaces the third edition (ISO 9680:2014), which has been technically revised.

The main changes compared to the previous edition are as follows:

- normative references have been updated;
- requirements and test methods for the illumination pattern, illuminance in patient's eyes, colour fidelity and photobiological hazards have been updated.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.

Introduction

This document provides the dentist and his staff with means to enable them to work with optimum visual ease and comfort, i.e. a visual acuity of 90 % to 100 % according to zone, without adversely affecting their perception of colour or causing excessive fatigue or photobiological injury.

In this document, the safety of an operating light is assessed in combination with its power supply. Such power supplies may be incorporated in dental units or dental patient chairs.

Any item of equipment recommended by the manufacturer for use in conjunction with an operating light should not render the equipment unsafe nor affect its qualities adversely.

IEC 60598-1 has been taken into account during the preparation of this document.

This document refers to IEC 60601-1, the basic standard on safety of medical electrical equipment, wherever relevant, by stating the respective clause numbers of IEC 60601-1.

This document takes priority over IEC 60601-1 as specified in the individual clauses of this document.

Only the specifications laid down in this document are applicable.
