Second edition
2015-09-01

Non-destructive testing — Magnetic particle testing —

Part 1: General principles

*Essais non destructifs — Magnétoscopie —
Partie 1: Principes généraux du contrôle*

Reference number
ISO 9934-1:2015(E)

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Qualification and certification of personnel	1
5 Safety and environmental requirements	2
6 Testing procedure	2
7 Surface preparation	2
8 Magnetization	2
8.1 General requirements	2
8.2 Verification of magnetization	3
8.3 Magnetizing techniques	3
8.3.1 General	3
8.3.2 Current flow techniques	4
8.3.3 Magnetic flow techniques	4
9 Detection media	5
9.1 Properties and selection of media	5
9.2 Testing of detection media	6
9.3 Application of detection media	6
10 Viewing conditions	6
11 Overall performance test	6
12 Interpretation and recording of indications	6
13 Demagnetization	7
14 Cleaning	7
15 Test report	7
Annex A (informative) Example for determination of currents required to achieve specified tangential field strengths for various magnetization techniques	13

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

ISO 9934-1 was prepared by the European Committee for Standardization (CEN) Technical Committee CEN/TC 138, *Non-destructive testing*, in collaboration with ISO/TC 135, *Non-destructive testing*, Subcommittee SC 2, *Surface methods*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

This second edition cancels and replaces the first edition (ISO 9934-1:2001), which has been technically revised.

ISO 9934 consists of the following parts under the general title *Non-destructive testing — Magnetic particle testing*:

- *Part 1: General principles*
- *Part 2: Detection media*
- *Part 3: Equipment*
