Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 10918-5 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*, in collaboration with ITU-T. The identical text is published as Rec. ITU-T T.871 (05/2011).

ISO/IEC 10918 consists of the following parts, under the general title *Information technology — Digital compression and coding of continuous-tone still images*:

- *Part 1: Requirements and guidelines*
- *Part 2: Compliance testing*
- *Part 3: Extensions*
- *Part 4: Registration of JPEG profiles, SPIFF profiles, SPIFF tags, SPIFF colour spaces, APPn markers, SPIFF compression types and Registration Authorities (REGAUT)*
- *Part 5: JPEG File Interchange Format (JFIF)*
- *Part 6: Application to printing systems*

Table of Contents

	<i>Page</i>
1 Scope	1
2 Normative references.....	1
2.1 Identical Recommendations International Standards	1
2.2 Paired Recommendations International Standards equivalent in technical content.....	1
2.3 Additional references	1
3 Definitions	1
4 Abbreviations	1
5 Conformance	2
6 JPEG File Interchange Format (JFIF) overview.....	2
6.1 JPEG compression	2
6.2 Colour space.....	2
6.3 JFIF APP ₀ marker segment	3
6.4 APP ₀ marker used to specify JFIF extensions	3
6.5 Application marker segments used for application-specific information	3
7 Conversion to and from RGB	3
8 Image orientation.....	4
9 Spatial relationship of components.....	4
10 JPEG File Interchange Format (JFIF) specification	6
10.1 JFIF file syntax.....	6
10.2 JFIF extension APP ₀ marker segment	7
10.3 JFIF extension: Thumbnail coded using JPEG encoding.....	7
10.4 JFIF extension: Thumbnail stored using one byte per pixel.....	8
10.5 JFIF extension: Thumbnail stored using three bytes per pixel.....	8
Bibliography	9
