About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

CONTENTS

FOREWORD.....	4
INTRODUCTION.....	6
1 Scope.....	8
2 Normative references	8
3 Terms, definitions and abbreviated terms	8
3.1 Terms and definitions.....	8
3.2 Abbreviated terms.....	9
4 Conformance.....	9
5 Structure of the generic cabling system	10
5.1 General.....	10
5.2 Functional elements.....	10
5.3 General structure and hierarchy.....	11
5.3.1 General	11
5.3.2 Campus and building backbone cabling subsystem.....	11
5.3.3 Horizontal cabling subsystem	11
5.3.4 Design objectives	11
5.4 Interconnection of subsystems	12
5.4.1 General	12
5.4.2 Centralized cabling architecture.....	12
5.5 Accommodation of functional elements	12
5.6 Dimensioning and configuring	13
5.6.1 Distributors	13
5.6.2 Connecting hardware.....	15
5.6.3 Work area cords and equipment cords.....	15
5.6.4 Patch cords and jumpers	15
5.6.5 Telecommunications outlet	15
5.6.6 Consolidation point.....	16
5.6.7 Telecommunications rooms and equipment rooms.....	17
5.6.8 External services cabling.....	17
6 Channel performance requirements	17
6.1 General.....	17
6.2 Environmental performance	18
6.3 Transmission performance	18
6.3.1 General	18
6.3.2 Balanced cabling	19
6.3.3 Optical fibre cabling.....	19
7 Link performance requirements	19
7.1 General.....	19
7.2 Balanced cabling	19
7.3 Optical fibre cabling	19
8 Reference implementations	20
8.1 General.....	20
8.2 Balanced cabling	20
8.2.1 General	20
8.2.2 Horizontal cabling.....	20
8.2.3 Campus and building backbone cabling system	23

8.3	Optical fibre cabling	23
8.3.1	General	23
8.3.2	Component selection	23
8.3.3	Dimensions.....	23
9	Cable requirements	25
9.1	General.....	25
9.2	Balanced cables	26
9.3	Optical fibre cables	26
10	Connecting hardware requirements	26
10.1	General requirements	26
10.2	Connecting hardware for balanced cabling.....	26
10.2.1	General requirements	26
10.2.2	Electrical, mechanical and environmental performance.....	26
10.3	Connecting hardware for optical fibre cabling.....	27
10.3.1	General requirements	27
10.3.2	Optical, mechanical and environmental performance	27
11	Cord requirements	27
11.1	Jumpers.....	27
11.2	Balanced cords	27
11.2.1	General	27
11.2.2	Additional requirements for work area cords	27
11.3	Optical fibre cords.....	27
	Bibliography.....	28
	Figure 1 – Relationships between the generic cabling documents produced by ISO/IEC JTC 1/SC 25	6
	Figure 2 – Structure of generic cabling	11
	Figure 3 – Hierarchical structure of generic cabling.....	12
	Figure 4 – Structures for centralized generic cabling.....	12
	Figure 5 – Accommodation of functional elements	13
	Figure 6 – Example of a generic cabling system with combined BD and FD	14
	Figure 7 – Inter-relationship of functional elements in an installation with redundancy	15
	Figure 8 –Channel, permanent link and CP link.....	18
	Figure 9 – Example of a system showing the location of cabling interfaces and extent of associated channels	18
	Figure 10 – Horizontal cabling models	21
	Figure 11 – Combined backbone/horizontal channels.....	25
	Table 1 – Maximum channel lengths	14
	Table 2 – Length assumptions used in the mathematical modelling of balanced horizontal cabling.....	22
	Table 3 – Horizontal link length equations.....	22

INFORMATION TECHNOLOGY – GENERIC CABLING FOR CUSTOMER PREMISES –

Part 2: Office premises

FOREWORD

- 1) ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.
- 2) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees and ISO member bodies.
- 3) IEC, ISO and ISO/IEC publications have the form of recommendations for international use and are accepted by IEC National Committees and ISO member bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC, ISO and ISO/IEC publications is accurate, IEC or ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees and ISO member bodies undertake to apply IEC, ISO and ISO/IEC publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any ISO, IEC or ISO/IEC publication and the corresponding national or regional publication should be clearly indicated in the latter.
- 5) ISO and IEC do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. ISO or IEC are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or ISO or its directors, employees, servants or agents including individual experts and members of their technical committees and IEC National Committees or ISO member bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication of, use of, or reliance upon, this ISO/IEC publication or any other IEC, ISO or ISO/IEC publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this ISO/IEC publication may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

International Standard ISO/IEC 11801-2 was prepared by subcommittee 25: Interconnection of information technology equipment, of ISO/IEC joint technical committee 1: Information technology.

This first edition, together with ISO/IEC 11801-1, cancels and replaces ISO/IEC 11801:2002, Amendment 1:2008 and Amendment 2:2010. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) standard re-structured to contain only those requirements that are specific for generic cabling systems installed in offices,
- b) alignment of functional element designations with the generic terminology of ISO/IEC 11801-1,
- c) reference to the campus and building backbone cabling system specification of ISO/IEC 11801-1,
- d) reference to the channel and link specifications of ISO/IEC 11801-1.

This is a preview of "ISO/IEC 11801-2:2017". [Click here to purchase the full version from the ANSI store.](#)

ISO/IEC 11801-2 is to be read in conjunction with ISO/IEC 11801-1.

This International Standard has been approved by vote of the member bodies, and the voting results may be obtained from the address given on the second title page.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the ISO/IEC 11801 series, published under the general title *Information technology – Generic cabling for customer premises*, can be found on the IEC website.
