About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigenda or an amendment might have been published.

IEC Catalogue - webstore.iec.ch/catalogue

The stand-alone application for consulting the entire bibliographical information on IEC International Standards, Technical Specifications, Technical Reports and other documents. Available for PC, Mac OS, Android Tablets and iPad.

IEC publications search - www.iec.ch/searchpub

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee,...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and also once a month by email.

Electropedia - www.electropedia.org

The world's leading online dictionary of electronic and electrical terms containing 20 000 terms and definitions in English and French, with equivalent terms in 16 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

IEC Glossary - std.iec.ch/glossary

65 000 electrotechnical terminology entries in English and French extracted from the Terms and Definitions clause of IEC publications issued since 2002. Some entries have been collected from earlier publications of IEC TC 37, 77, 86 and CISPR.

IEC Customer Service Centre - webstore.iec.ch/csc

CONTENTS

FOREWORD.....	5
INTRODUCTION.....	7
1 Scope.....	9
2 Normative references	9
3 Terms, definitions and abbreviated terms	9
3.1 Terms and definitions.....	9
3.2 Abbreviated terms.....	10
4 Conformance.....	11
5 Structure of the generic cabling system	11
5.1 General.....	11
5.2 Functional elements.....	12
5.3 Cabling subsystems for ICT and BCT.....	12
5.3.1 General	12
5.3.2 Primary home cabling subsystem.....	14
5.3.3 Secondary home cabling subsystem	14
5.4 Cabling structure	14
5.5 Interfaces.....	15
5.5.1 Equipment interfaces and test interfaces	15
5.5.2 Channel and permanent link	16
5.5.3 Network access cabling	17
5.5.4 External network interface	18
5.6 Accommodation of functional elements	18
5.6.1 General	18
5.6.2 Coverage areas	19
5.6.3 Dimensioning and configuring.....	20
5.6.4 Connecting hardware.....	21
5.6.5 Application outlets	21
5.6.6 Equipment cords.....	21
6 Channel performance requirements	22
6.1 General.....	22
6.2 Environmental performance	22
6.3 Transmission performance	22
6.3.1 Channel construction	22
6.3.2 Balanced cabling	22
6.3.3 Coaxial cabling.....	23
6.3.4 Optical fibre cabling.....	23
7 Link performance requirements	23
7.1 General.....	23
7.2 Balanced cabling	23
7.3 Coaxial cabling	23
7.4 Optical fibre cabling	23
8 Reference implementations	23
8.1 General.....	23
8.2 Channel construction	24
8.3 Balanced cabling	24
8.3.1 General	24

8.3.2	ICT channels	25
8.3.3	BCT channels	25
8.4	Coaxial cabling	26
8.5	Optical fibre cabling	26
8.5.1	General	26
8.5.2	Component selection	26
8.5.3	Dimensions.....	26
9	Cable requirements	26
9.1	General.....	26
9.2	Balanced cables	27
9.2.1	ICT cabling.....	27
9.2.2	BCT cabling.....	27
9.3	Coaxial cables	27
9.4	Optical fibre cables	27
10	Connecting hardware requirements	27
10.1	General requirements	27
10.2	Connecting hardware for balanced cabling.....	27
10.2.1	General requirements	27
10.2.2	Electrical, mechanical and environmental performance.....	27
10.3	Connecting hardware for coaxial cabling.....	28
10.3.1	General requirements	28
10.3.2	Electrical, mechanical and environmental performance.....	28
10.4	Connecting hardware for optical fibre cabling.....	28
10.4.1	General requirements	28
10.4.2	Optical, mechanical and environmental performance	28
11	Cords	28
11.1	Jumpers.....	28
11.2	Balanced cords	28
11.3	Coaxial cords.....	28
11.4	Optical fibre cords.....	28
Annex A (informative)	Reference implementation of TV and radio applications – use of baluns	29
A.1	Types and locations of baluns.....	29
A.1.1	General	29
A.1.2	Baluns at the ENI and baluns at the equipment interface toward the PHD	29
A.1.3	Baluns near or in the BO	30
A.1.4	Baluns in the cord between BO and the terminal equipment	31
A.2	Home network interface	31
Bibliography.....		33
Figure 1 – Relationships between the generic cabling documents produced by ISO/IEC JTC 1/SC 25		7
Figure 2 – Structure of the generic cabling system.....		12
Figure 3 – Interconnect and cross-connect models		13
Figure 4 – Interconnect and cross-connects at the PHD.....		13
Figure 5 – Hierarchical structure of a generic cabling system in support of ICT and BCT applications.....		14

Figure 6 – Equipment and test interfaces in support of ICT and BCT applications	16
Figure 7 – Channels and permanent links within the home	17
Figure 8 – Examples of interconnection of home and network access cabling	18
Figure 9 – Overview of a generic cabling for home	19
Figure 10 – Interconnection of home cabling subsystems	20
Figure 11 – Reference implementations for ICT and BCT channels (PHD/SHD to TO/BO)	24
Figure A.1 – Balun at the ENI	29
Figure A.2 – Baluns in the PHD	30
Figure A.3 – Balun built into the system outlet	30
Figure A.4 – Balun in the cord between BO and the TE	31
Figure A.5 – Types of HNI	32
Table 1 – Maximum channel lengths for reference implementations of ICT/BCT channels	21
Table 2 – Link length equations	25
Table A.1 – Insertion loss and total sectional slope	32

INFORMATION TECHNOLOGY – GENERIC CABLING FOR CUSTOMER PREMISES

Part 4: Single-tenant homes

FOREWORD

- 1) ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.
- 2) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC National Committees and ISO member bodies.
- 3) IEC, ISO and ISO/IEC publications have the form of recommendations for international use and are accepted by IEC National Committees and ISO member bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC, ISO and ISO/IEC publications is accurate, IEC or ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC National Committees and ISO member bodies undertake to apply IEC, ISO and ISO/IEC publications transparently to the maximum extent possible in their national and regional publications. Any divergence between any ISO, IEC or ISO/IEC publication and the corresponding national or regional publication should be clearly indicated in the latter.
- 5) ISO and IEC do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC marks of conformity. ISO or IEC are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this publication.
- 7) No liability shall attach to IEC or ISO or its directors, employees, servants or agents including individual experts and members of their technical committees and IEC National Committees or ISO member bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication of, use of, or reliance upon, this ISO/IEC publication or any other IEC, ISO or ISO/IEC publications.
- 8) Attention is drawn to the normative references cited in this publication. Use of the referenced publications is indispensable for the correct application of this publication.
- 9) Attention is drawn to the possibility that some of the elements of this ISO/IEC publication may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

International Standard ISO/IEC 11801-4 was prepared by subcommittee 25: Interconnection of information technology equipment, of ISO/IEC joint technical committee 1: Information technology.

This first edition cancels and replaces ISO/IEC 15018:2004 and Amendment 1:2009. This edition constitutes a technical revision.

This edition includes the following significant technical changes with respect to the previous edition:

- a) standard re-structured to contain only those requirements that are specific for generic cabling systems installed in homes;
- b) the channel performance Class CCCB and related reference implementations have been deleted and are now addressed as distributed building services in ISO/IEC 11801-6;
- c) implementation options now include optical fibre in addition to balanced and coaxial media.

ISO/IEC 11801-4 is to be read in conjunction with ISO/IEC 11801-1.

This is a preview of "ISO/IEC 11801-4:2017". [Click here to purchase the full version from the ANSI store.](#)

This International Standard has been approved by vote of the member bodies, and the voting results may be obtained from the address given on the second title page.

This document has been drafted in accordance with the ISO/IEC Directives, Part 2.

A list of all parts in the ISO/IEC 11801 series, published under the general title *Information technology – Generic cabling for customer premises*, can be found on the IEC website.
