

Second edition
2010-12-15

Information technology — Security techniques — Non-repudiation —

Part 2:

Mechanisms using symmetric techniques

Technologies de l'information — Techniques de sécurité — Non-répudiation —

Partie 2: Mécanismes utilisant des techniques symétriques

Reference number
ISO/IEC 13888-2:2010(E)

Contents	Page
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols and abbreviated terms	3
5 Notation	3
5.1 Notation from ISO/IEC 13888-1	3
5.2 Notation unique for the purposes of this part of ISO/IEC 13888	4
6 Requirements	4
7 Secure envelopes	5
8 Generation and verification of non-repudiation tokens	5
8.1 Creation of tokens by the TTP	5
8.2 Data items used in the non-repudiation mechanisms	5
8.3 Non-repudiation tokens	6
8.4 Verification of tokens by the TTP	7
9 Specific non-repudiation mechanisms	8
9.1 Mechanisms for non-repudiation	8
9.2 Mechanism for non-repudiation of origin	8
9.3 Mechanism for non-repudiation of delivery	9
9.4 Mechanism for obtaining a time stamping token	10
Annex A (informative) Examples of specific non-repudiation mechanisms	11
A.1 Examples of non-repudiation mechanisms of origin and delivery	11
A.2 Mechanism M1: Mandatory NRO, optional NRD	11
A.3 Mechanism M2: Mandatory NRO, mandatory NRD	13
A.4 Mechanism M3: Mandatory NRO and NRD with intermediary TTP	14
Bibliography	17

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 13888-2 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 27, *IT Security techniques*.

This second edition cancels and replaces the first edition (ISO/IEC 13888-2:1998), which has been technically revised.

ISO/IEC 13888 consists of the following parts, under the general title *Information technology — Security techniques — Non-repudiation*:

- *Part 1: General*
- *Part 2: Mechanisms using symmetric techniques*
- *Part 3: Mechanisms using asymmetric techniques*
