Foreword ... **v**

Introduction ... **vi**

1 Scope ... **1**

2 Normative references ... **1**

3 Terms and definitions ... **2**

4 Symbols and abbreviated terms ... **3**

5 Initial dialogs ... **4**
5.1 Alternating PICC and PCD support (PXD) ... 4
5.2 Alternating between Type A and Type B commands ... 5
5.2.1 Polling ... 5
5.2.2 Influence of Type A commands on PICC Type B operation ... 5
5.2.3 Influence of Type B commands on PICC Type A operation ... 6
5.2.4 Transition to POWER-OFF state ... 6

6 Type A — Initialization and anticollision ... **6**
6.1 etu ... 6
6.2 Frame format and timing ... 6
6.2.1 Frame delay time ... 7
6.2.2 Request Guard Time ... 8
6.2.3 Frame formats ... 8
6.2.4 CRC_A ... 11
6.3 PICC states ... 12
6.3.1 POWER-OFF state ... 13
6.3.2 IDLE state ... 14
6.3.3 READY state ... 14
6.3.4 ACTIVE state ... 14
6.3.5 HALT state ... 14
6.3.6 READY* state ... 14
6.3.7 ACTIVE* state ... 14
6.3.8 PROTOCOL state ... 15
6.4 Command set ... 15
6.4.1 REQA and WUPA commands ... 15
6.4.2 ANTICOLLISION and SELECT commands ... 16
6.4.3 HLTA command ... 16
6.5 Select sequence ... 16
6.5.1 Select sequence flowchart ... 16
6.5.2 ATQA — Answer to Request ... 17
6.5.3 Anticollision and Select ... 18
6.5.4 UID contents and cascade levels ... 22

7 Type B — Initialization and anticollision ... **24**
7.1 Character, frame format and timing ... 24
7.1.1 Character transmission format ... 24
7.1.2 Character separation ... 24
7.1.3 Frame format ... 25
7.1.4 SOF ... 25
7.1.5 EOF ... 26
7.1.6 Timing before the PICC SOF ... 27
7.1.7 Timing before the PCD SOF ... 27
7.2 CRC_B ... 28
7.3 Anticollision sequence ... 28
7.4 PICC states description ... 29
7.4.1 Initialization and anticollision flowchart ... 31
7.4.2 General statement for state description and transitions ... 31

7.4.3 POWER-OFF state ... 32
7.4.4 IDLE state ... 32
7.4.5 READY-REQUESTED sub-state ... 32
7.4.6 READY-DECLARED sub-state ... 32
7.4.7 PROTOCOL state ... 33
7.4.8 HALT state ... 33
7.5 Command set ... 33
7.6 Anticollision response rules ... 34
7.6.1 PICC with initialization only ... 34
7.7 REQB/WUPB command ... 34
7.7.1 REQB/WUPB command format ... 34
7.7.2 Coding of anticollision prefix byte APf ... 34
7.7.3 Coding of AFI ... 35
7.7.4 Coding of PARAM ... 35
7.8 Slot-MARKER command ... 36
7.8.1 Slot-MARKER command format ... 36
7.8.2 Coding of anticollision prefix byte APn ... 37
7.9 ATQB Response ... 37
7.9.1 ATQB response format ... 37
7.9.2 PUPI (Pseudo-Unique PICC Identifier) ... 38
7.9.3 Application data ... 38
7.9.4 Protocol Info ... 38
7.10 ATTRIB command ... 42
7.10.1 ATTRIB command format ... 42
7.10.2 Identifier ... 42
7.10.3 Coding of Param 1 ... 42
7.10.4 Coding of Param 2 ... 44
7.10.5 Coding of Param 3 ... 44
7.10.6 Coding of Param 4 ... 45
7.10.7 Higher layer INF ... 45
7.11 Answer to ATTRIB command ... 45
7.12 HLTB command and Answer ... 46

8 Electromagnetic disturbance handling ... 47
8.1 General ... 47
8.2 EMD handling timing constraints ... 47
8.3 Recommendations for a PCD EMD handling algorithm ... 48

Annex A (informative) **Communication example Type A ... 49**

Annex B (informative) **CRC_A and CRC_B encoding ... 51**

Annex C (informative) **Type A timeslot — Initialization and anticollision ... 54**

Annex D (informative) **Example of Type B Anticollision Sequence ... 58**

Annex E (normative) **Bit rates of 3*fc*/4, *fc*, 3*fc*/2 and 2*fc* from PCD to PICC ... 61**

Bibliography ... 63

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/IEC JTC 1, *Information technology*, Subcommittee SC 17, *Identification cards and related devices*.

This third edition cancels and replaces the second edition (ISO/IEC 14443-3:2011), which has been technically revised. It also incorporates the Amendments ISO/IEC 14443-3:2011/Amd 1:2011, ISO/IEC 14443-3:2011/Amd 2:2012, ISO/IEC 14443-3:2011/Amd 3:2014 and ISO/IEC 14443-3:2011/Amd 6:2014.

ISO/IEC 14443 consists of the following parts, under the general title *Identification cards — Contactless integrated circuit cards — Proximity cards*:

— *Part 1: Physical characteristics*

— *Part 2: Radio frequency power and signal interface*

— *Part 3: Initialization and anti-collision*

— *Part 4: Transmission protocol*

This corrected version of ISO/IEC 14443-3:2016 incorporates the following correction.

Figure 4 was corrected: The last parity bit of a PICC standard frame with bit rate higher than fc/128 was changed from "odd" to "even".

Introduction

ISO/IEC 14443 is one of a series of International Standards describing the parameters for identification cards as defined in ISO/IEC 7810 and the use of such cards for international interchange.

This part of ISO/IEC 14443 describes polling for proximity cards entering the field of a proximity coupling device, the byte format and framing, the initial Request and Answer to Request command content, methods to detect and communicate with one proximity card among several proximity cards (anticollision) and other parameters required to initialize communications between a proximity card and a proximity coupling device. Protocols and commands used by higher layers and by applications and which are used after the initial phase are described in ISO/IEC 14443-4.

ISO/IEC 14443 is intended to allow operation of proximity cards in the presence of other contactless cards conforming to ISO/IEC 10536 and ISO/IEC 15693.
