

Third edition
2008-08-15

Corrected version
2011-06-01

Information technology Security techniques — Evaluation criteria for IT security —

Part 3: Security assurance components

Technologies de l'information — Techniques de sécurité — Critères d'évaluation pour la sécurité TI —

Partie 3: Composants d'assurance de sécurité

Reference number
ISO/IEC 15408-3:2008(E)

Foreword	ix
Introduction.....	xi
1 Scope	1
2 Normative references.....	1
3 Terms and definitions, symbols and abbreviated terms.....	1
4 Overview.....	1
4.1 Organisation of this part of ISO/IEC 15408.....	1
5 Assurance paradigm	2
5.1 ISO/IEC 15408 philosophy	2
5.2 Assurance approach	2
5.2.1 Significance of vulnerabilities.....	2
5.2.2 Cause of vulnerabilities	3
5.2.3 ISO/IEC 15408 assurance.....	3
5.2.4 Assurance through evaluation.....	3
5.3 ISO/IEC 15408 evaluation assurance scale.....	3
6 Security assurance components	4
6.1 Security assurance classes, families and components structure	4
6.1.1 Assurance class structure.....	4
6.1.2 Assurance family structure	5
6.1.3 Assurance component structure	6
6.1.4 Assurance elements.....	8
6.1.5 Component taxonomy.....	8
6.2 EAL structure	9
6.2.1 EAL name	9
6.2.2 Objectives	9
6.2.3 Application notes	9
6.2.4 Assurance components.....	10
6.2.5 Relationship between assurances and assurance levels	10
6.3 CAP structure	11
6.3.1 CAP name.....	11
6.3.2 Objectives	11
6.3.3 Application notes	11
6.3.4 Assurance components.....	12
6.3.5 Relationship between assurances and assurance levels	13
7 Evaluation assurance levels	13
7.1 Evaluation assurance level (EAL) overview	14
7.2 Evaluation assurance level details	15
7.3 Evaluation assurance level 1 (EAL1) - functionally tested.....	15
7.3.1 Objectives	15
7.3.2 Assurance components.....	16
7.4 Evaluation assurance level 2 (EAL2) - structurally tested	16
7.4.1 Objectives	16
7.4.2 Assurance components.....	16
7.5 Evaluation assurance level 3 (EAL3) - methodically tested and checked.....	17
7.5.1 Objectives	17
7.5.2 Assurance components.....	17
7.6 Evaluation assurance level 4 (EAL4) - methodically designed, tested, and reviewed.....	18
7.6.1 Objectives	18
7.6.2 Assurance components.....	18

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of the joint technical committee is to prepare International Standards. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 15408-3 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology, Subcommittee SC 27, IT Security techniques*. The identical text of ISO/IEC 15408 is published by the Common Criteria Project Sponsoring Organisations as Common Criteria for Information Technology Security Evaluation. The common XML source for both publications can be found at <http://www.oc.ccn.cni.es/xml>

This third edition cancels and replaces the second edition (ISO/IEC 15408-3:2005), which has been technically revised.

ISO/IEC 15408 consists of the following parts, under the general title *Information technology — Security techniques — Evaluation criteria for IT security*:

- *Part 1: Introduction and general model*
- *Part 2: Security functional components*
- *Part 3: Security assurance components*

This corrected version of ISO/IEC 15408-3:2008 incorporates miscellaneous editorial corrections mainly related to EAL4 and EAL6 assurance components, ADV_FSP, ADV_TDS, ATE_DPT.2, ATE_IND, and ALC.

Introduction

Security assurance components, as defined in this part of ISO/IEC 15408, are the basis for the security assurance requirements expressed in a Protection Profile (PP) or a Security Target (ST).

These requirements establish a standard way of expressing the assurance requirements for TOEs. This part of ISO/IEC 15408 catalogues the set of assurance components, families and classes. This part of ISO/IEC 15408 also defines evaluation criteria for PPs and STs and presents evaluation assurance levels that define the predefined ISO/IEC 15408 scale for rating assurance for Targets of Evaluation (TOEs), which is called the Evaluation Assurance Levels (EALs).

The audience for this part of ISO/IEC 15408 includes consumers, developers, and evaluators of secure IT products. ISO/IEC 15408-1:2009, Clause 5 provides additional information on the target audience of ISO/IEC 15408, and on the use of ISO/IEC 15408 by the groups that comprise the target audience. These groups may use this part of ISO/IEC 15408 as follows:

- a) Consumers, who use this part of ISO/IEC 15408 when selecting components to express assurance requirements to satisfy the security objectives expressed in a PP or ST, determining required levels of security assurance of the TOE.
- b) Developers, who respond to actual or perceived consumer security requirements in constructing a TOE, reference this part of ISO/IEC 15408 when interpreting statements of assurance requirements and determining assurance approaches of TOEs.
- c) Evaluators, who use the assurance requirements defined in this part of ISO/IEC 15408 as a mandatory statement of evaluation criteria when determining the assurance of TOEs and when evaluating PPs and STs.
