6.7.1	Reference.....	27
6.7.2	Procedure	28
6.8	Switching field distribution, (SF_D).....	28
6.8.1	Reference.....	28
6.8.2	Procedure	28
6.9	Test report	28
7	Test method for dynamic magnetic characteristics.....	28
7.1	Principle	28
7.2	Reference cards	29
7.3	Apparatus	29
7.3.1	Measuring instrument for classes L and S	29
7.3.2	Measuring instrument for class H.....	29
7.4	Preparation and preservation of test samples	29
7.4.1	Preparation	29
7.4.2	Preservation	29
7.4.3	Conditioning and testing environment.....	30
7.5	Test procedure	30
7.5.1	Test densities (D_{max} and D_{min}).....	30
7.6	Expression of results	30
7.6.1	Resolution	30
7.6.2	Modulation.....	30
7.7	Test report	31
8	Tests for cards containing contactless chips and antennas	31
8.1	Reliability of the chip/antenna connection for a strip of connected cards.....	31
8.1.1	Reference.....	31
8.1.2	Principle	31
8.1.3	Equipment	31
8.1.4	Procedure	32
8.1.5	Test report	32
8.2	Reliability of the chip/antenna connection for a single card	32
8.2.1	Reference.....	32
8.2.2	Principle	32
8.2.3	Equipment	33
8.2.4	Procedure	33
8.2.5	Test report	33
8.3	Test for chip/antenna connection withstanding scratch test	34
8.3.1	Reference.....	34
8.3.2	Principle	34
8.3.3	Equipment	34
8.3.4	Procedure	35
8.3.5	Test report	35
8.4	Test for card withstanding to Crumpling / Folding	35
8.4.1	Reference.....	35
8.4.2	Principle	35

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 15457-3 was prepared by Technical Committee ISO/TC JTC 1, *Information technology*, Subcommittee SC 17, *Cards and personal identification*.

This second edition cancels and replaces the first edition (ISO/IEC 15457-3:2002), of which has been technically revised.

ISO/IEC 15457 consists of the following parts, under the general title *Identification cards — Thin flexible cards*:

- *Part 1: Physical characteristics*
- *Part 2: Magnetic recording technique*
- *Part 3: Test methods*
