ISO/IEC 19762

Information technology — Automatic identification and data capture (AIDC) techniques — Vocabulary

*Technologies de l'information — Technique automatiques
d'identification et de saisie de données (AIDC) — Vocabulaire*

Second edition
2025-04

Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 Terms related to general concepts.....	1
3.1.1 Basic general concepts.....	1
3.1.2 General concepts for technical features.....	11
3.1.3 General concepts for symbology.....	16
3.1.4 General concepts for hardware.....	18
3.1.5 General concepts for applications.....	21
3.2 Terms related to optically readable media.....	26
3.2.1 Basic concepts for optically readable media.....	26
3.2.2 Technical feature concepts for optically readable media.....	28
3.2.3 Concepts for optically readable media hardware.....	31
3.3 Terms related to linear bar code symbols.....	36
3.3.1 Basic concepts for linear bar code symbols.....	36
3.3.2 Technical feature concepts for linear bar code symbols.....	37
3.4 Terms related to two-dimensional symbols.....	39
3.5 Terms related to radio frequency identification.....	42
3.5.1 Basic concepts for radio frequency identification.....	42
3.5.2 Technical feature concepts for radio frequency identification.....	44
3.5.3 Concepts for radio frequency identification hardware.....	51
3.5.4 Concepts for radio frequency identification application.....	53
3.6 Terms related to radio.....	57
3.6.1 Basic concepts for radio.....	57
3.6.2 Technical feature concepts for radio.....	73
3.7 Terms related to locating systems.....	74
3.7.1 Basic concepts for locating systems.....	74
3.7.2 Technical feature concepts for locating systems.....	75
3.8 Terms related to mobile item identification and management.....	78
3.9 Terms related to sensors.....	82
Bibliography	86
Index	89

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (www.iso.org/directives or www.iec.ch/members_experts/refdocs).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 31, *Automatic identification and data capture techniques*.

This second edition cancels and replaces the first edition of ISO/IEC 19762:2016, which has been technically revised.

The main changes are as follows:

- French, Russian, German and Korean terms have been deleted;
- outdated terms have been deleted;
- the sources in terminological entries have been updated;
- the abbreviated terms have been updated and moved to Annex A.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.

This document is intended to facilitate international communication in information technology, specifically in the area of automatic identification and data capture (AIDC) techniques by defining terms used across multiple AIDC techniques.
