Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	2
5 Overview	3
6 Variant constructors	6
6.1 General.....	6
6.2 Access to variant constructors.....	6
6.3 Encryption of variant constructors.....	6
7 Variant byte ranges	7
7.1 Overview.....	7
7.2 Access to variant byte ranges.....	7
7.3 Encryption of variant byte range information.....	8
8 Sample variants	8
8.1 General.....	8
8.2 Access to sample variants.....	8
8.3 Encryption of sample variants.....	8
9 Variant data stream	8
9.1 Variant data.....	8
9.1.1 General.....	8
9.1.2 Definition.....	8
9.1.3 Syntax.....	9
9.1.4 Semantics.....	9
9.2 Variant constructor list.....	9
9.2.1 Definition.....	9
9.2.2 Syntax.....	9
9.2.3 Semantics.....	9
9.3 Variant constructor.....	10
9.3.1 Syntax.....	10
9.3.2 Semantics.....	10
10 Carriage of variant data stream in ISO/BMFF	12
10.1 General.....	12
10.2 Variant tracks.....	12
10.2.1 Definition.....	12
10.2.2 Association.....	12
10.2.3 Variant metadata sample entry.....	13
10.3 Variant data.....	14
10.3.1 Encryption.....	14
10.3.2 Association.....	15
11 Carriage of variant data stream in MPEG-2 TS	16
11.1 General.....	16
11.2 Sample variant metadata streams.....	16
11.2.1 Definition.....	16
11.2.2 Association.....	17
11.2.3 Metadata descriptor for sample variant metadata stream.....	18
11.2.4 Sample variant metadata configuration.....	18
11.2.5 PES Packetization.....	19
11.2.6 Encryption.....	19
11.3 Association.....	20

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see <http://patents.iec.ch>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*.

This second edition cancels and replaces the first edition (ISO/IEC 23001-12:2015), which has been technically revised.

The main changes compared to the previous edition are as follows:

- support for using sample variants for multiple alternate samples;
- support for using sample variants for multiple alternate protection schemes;
- support for carriage of sample variants in MPEG-2 transport streams.

A list of all parts in the ISO/IEC 23001 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
