

Fifth edition
2023-10

Information technology — High efficiency coding and media delivery in heterogeneous environments —

Part 2: High efficiency video coding

Technologies de l'information — Codage à haute efficacité et livraison des médias dans des environnements hétérogènes —

Partie 2: Codage vidéo à haute efficacité

Contents	Page
Foreword	vii
Introduction	viii
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Abbreviated terms	22
5 Conventions	24
5.1 General.....	24
5.2 Arithmetic operators.....	24
5.3 Logical operators	25
5.4 Relational operators.....	25
5.5 Bit-wise operators.....	25
5.6 Assignment operators.....	26
5.7 Range notation.....	26
5.8 Mathematical functions.....	26
5.9 Order of operation precedence.....	27
5.10 Variables, syntax elements, and tables.....	28
5.11 Text description of logical operations	29
5.12 Processes.....	30
6 Bitstream and picture formats, partitionings, scanning processes, and neighbouring relationships	31
6.1 Bitstream formats.....	31
6.2 Source, decoded, and output picture formats.....	31
6.3 Partitioning of pictures, slices, slice segments, tiles, CTUs, and CTBs.....	34
6.3.1 Partitioning of pictures into slices, slice segments, and tiles	34
6.3.2 Block and quadtree structures.....	36
6.3.3 Spatial or component-wise partitionings	37
6.4 Availability processes	37
6.4.1 Derivation process for z-scan order block availability	37
6.4.2 Derivation process for prediction block availability.....	38
6.5 Scanning processes.....	40
6.5.1 CTB raster and tile scanning conversion process	40
6.5.2 Z-scan order array initialization process.....	41
6.5.3 Up-right diagonal scan order array initialization process.....	41
6.5.4 Horizontal scan order array initialization process.....	42
6.5.5 Vertical scan order array initialization process.....	42

This is a preview of ISO/IEC 23008-2:2023. [Click here to purchase the full version from the ANSI store.](#)

6.5.6	Traverse scan order array initialization process	43
7	Syntax and semantics	43
7.1	Method of specifying syntax in tabular form	43
7.2	Specification of syntax functions and descriptors	44
7.3	Syntax in tabular form	46
7.3.1	NAL unit syntax	46
7.3.2	Raw byte sequence payloads, trailing bits, and byte alignment syntax	47
7.3.3	Profile, tier and level syntax	56
7.3.4	Scaling list data syntax	59
7.3.5	Supplemental enhancement information message syntax	60
7.3.6	Slice segment header syntax	60
7.3.7	Short-term reference picture set syntax	65
7.3.8	Slice segment data syntax	66
7.4	Semantics	81
7.4.1	General	81
7.4.2	NAL unit semantics	81
7.4.3	Raw byte sequence payloads, trailing bits, and byte alignment semantics	92
7.4.4	Profile, tier, and level semantics	114
7.4.5	Scaling list data semantics	119
7.4.6	Supplemental enhancement information message semantics	121
7.4.7	Slice segment header semantics	122
7.4.8	Short-term reference picture set semantics	131
7.4.9	Slice segment data semantics	134
8	Decoding process	151
8.1	General decoding process	151
8.1.1	General	151
8.1.2	CVSG decoding process	151
8.1.3	Decoding process for a coded picture with nuh_layer_id equal to 0	152
8.2	NAL unit decoding process	154
8.3	Slice decoding process	154
8.3.1	Decoding process for picture order count	154
8.3.2	Decoding process for reference picture set	155
8.3.3	Decoding process for generating unavailable reference pictures	161
8.3.4	Decoding process for reference picture lists construction	162
8.3.5	Decoding process for collocated picture and no backward prediction flag	163
8.4	Decoding process for coding units coded in intra prediction mode	164
8.4.1	General decoding process for coding units coded in intra prediction mode	164

This is a preview of ISO/IEC 23008-2:2023. [Click here to purchase the full version from the ANSI store.](#)

8.4.2	Derivation process for luma intra prediction mode.....	168
8.4.3	Derivation process for chroma intra prediction mode	171
8.4.4	Decoding process for intra blocks	171
8.5	Decoding process for coding units coded in inter prediction mode.....	184
8.5.1	General decoding process for coding units coded in inter prediction mode	184
8.5.2	Inter prediction process.....	185
8.5.3	Decoding process for prediction units in inter prediction mode.....	188
8.5.4	Decoding process for the residual signal of coding units coded in inter prediction mode	221
8.6	Scaling, transformation and array construction process prior to deblocking filter process	226
8.6.1	Derivation process for quantization parameters	226
8.6.2	Scaling and transformation process	228
8.6.3	Scaling process for transform coefficients	230
8.6.4	Transformation process for scaled transform coefficients	231
8.6.5	Residual modification process for blocks using a transform bypass	234
8.6.6	Residual modification process for transform blocks using cross-component prediction.....	235
8.6.7	Picture construction process prior to in-loop filter process	235
8.6.8	Residual modification process for blocks using adaptive colour transform.....	236
8.7	In-loop filter process	238
8.7.1	General	238
8.7.2	Deblocking filter process.....	239
8.7.3	Sample adaptive offset process.....	257
9	Parsing process.....	260
9.1	General	260
9.2	Parsing process for 0-th order Exp-Golomb codes	260
9.2.1	General	260
9.2.2	Mapping process for signed Exp-Golomb codes	262
9.3	CABAC parsing process for slice segment data	262
9.3.1	General	262
9.3.2	Initialization process.....	265
9.3.3	Binarization process.....	278
9.3.4	Decoding process flow.....	288
9.3.5	Arithmetic encoding process	304

10 Sub-bitstream extraction process	311
Annex A (normative) Profiles, tiers and levels	313
Annex B (normative) Byte stream format	343
Annex C (normative) Hypothetical reference decoder	346
Annex D (normative) Supplemental enhancement information	367
Annex E (normative) Video usability information	529
Annex F (normative) Common specifications for multi-layer extensions	559
Annex G (normative) Multiview high efficiency video coding	717
Annex H (normative) Scalable high efficiency video coding	743
Annex I (normative) 3D high efficiency video coding	774
Bibliography	898

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 29, *Coding of audio, picture, multimedia and hypermedia information*, in collaboration with ITU-T (as Rec. ITU-T H.265).

This fifth edition cancels and replaces the fourth edition (ISO/IEC 23008-2:2020), which has been technically revised. It also incorporates the amendment ISO/IEC 23008-2:2020/Amd 1:2021.

The main changes are as follows:

- the specification of four additional “levels” of high capability for all profiles, referred to as levels 6.3, 7, 7.1, and 7.2;
- the specification of level 8.5 for the video profiles, which had previously been specified only for still picture profiles and which provides a way to identify bitstreams for which it is possible that the bitstreams do not conform to non-syntactical constraints specified for bitstream conformance to other levels.

A list of all parts in the ISO/IEC 23008 series can be found on the ISO and IEC websites.
