Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents) or the IEC list of patent declarations received (see <https://patents.iec.ch>).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 40, *IT Service Management IT Governance*.

This second edition cancels and replaces the first edition (ISO/IEC 30105-4:2016), which has been technically revised.

The main changes are as follows:

- This edition addresses editorial issues in the 1st edition of ISO/IEC 30105-4:2016.
- This edition modifies terms to use the same definition as the source, except for the ones agreed for modification.
- This edition is revised to contain only those terms that are relevant to ISO/IEC 30105-4.
- The title has been modified from “Terms and concepts” to “Key concepts.”
- “Work product” has been changed to “Information item” by reflecting the term used in ISO/IEC/IEEE 24774:2021.

A list of all parts in the ISO/IEC 30105 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.

Introduction

ITES-BPO services encompass the delegation of one or more IT enabled business processes to a service provider who uses appropriate technology to deliver that services. Such a service provider manages, delivers, improves and administers the outsourced business processes in accordance with predefined and measurable performance metrics. This covers diverse business process areas such as finance, human resource management, administration, health care, banking and financial services, supply chain management, travel and hospitality, media, market research, analytics, telecommunication, manufacturing, etc. These services provide business solutions to customers across the globe and form part of the core service delivery chain for customers.

The ISO/IEC 30105 series specifies the lifecycle process requirements involved in the ITES-BPO industry.

- It provides an overarching standard for all aspects of ITES-BPO industry from the view of the service provider that performs the outsourced business processes. This is applicable for any ITES-BPO service provider providing services to customers through contracts and in industry verticals.
- It covers the entire outsourcing lifecycle and defines the processes that are considered to be good practices.
- It is an improvement standard that enables risk determination and improvement for service providers performing outsourced business processes.
- It also serves as a PRM for service providers.
- It focuses on IT enabled business processes which are outsourced.
- It is generic and can be applied to all IT enabled business process outsourced services, regardless of type, size and the nature of the services delivered.
- Process improvements implemented using the ISO/IEC 30105 series can lead to a clear return on investment for customers and service providers.
- Alignment to the ISO/IEC 30105 series can improve consistency, quality and predictability in delivery of services.

[Figure 1](#) illustrates the key entities and relationships involved in an ITES-BPO service. It includes the customer, the ITES-BPO service provider and various levels of suppliers. This is aligned with the supply chain relationship depicted in ISO/IEC 20000-1:2018, 8.3.1.
