About the IEC

The International Electrotechnical Commission (IEC) is the leading global organization that prepares and publishes International Standards for all electrical, electronic and related technologies.

About IEC publications

The technical content of IEC publications is kept under constant review by the IEC. Please make sure that you have the latest edition, a corrigendum or an amendment might have been published.

IEC publications search - webstore.iec.ch/advsearchform

The advanced search enables to find IEC publications by a variety of criteria (reference number, text, technical committee, ...). It also gives information on projects, replaced and withdrawn publications.

IEC Just Published - webstore.iec.ch/justpublished

Stay up to date on all new IEC publications. Just Published details all new publications released. Available online and once a month by email.

IEC Customer Service Centre - webstore.iec.ch/csc

If you wish to give us your feedback on this publication or need further assistance, please contact the Customer Service Centre: sales@iec.ch.

IEC Products & Services Portal - products.iec.ch

Discover our powerful search engine and read freely all the publications previews. With a subscription you will always have access to up to date content tailored to your needs.

Electropedia - www.electropedia.org

The world's leading online dictionary on electrotechnology, containing more than 22 300 terminological entries in English and French, with equivalent terms in 19 additional languages. Also known as the International Electrotechnical Vocabulary (IEV) online.

CONTENTS

FOREWORD.....	4
INTRODUCTION.....	5
1 Scope.....	6
2 Normative references	6
3 Terms and definitions	6
4 Description of IIoT compatibility aspects and levels	8
4.1 IIoT compatibility aspects.....	8
4.1.1 General	8
4.1.2 Connectivity functional compatibility description by aspects for the IIoT entities	8
4.1.3 Connectivity non-functional compatibility description by aspects for the IIoT entities	9
4.2 IIoT compatibility levels.....	10
5 Compatibility requirements	10
5.1 Connectivity functional compatibility aspects.....	10
5.1.1 Compatibility requirements for physical aspect	10
5.1.2 Compatibility requirements for MAC aspect	11
5.1.3 Compatibility requirements for LLC aspect.....	11
5.1.4 Compatibility requirements for network aspect.....	12
5.1.5 Compatibility requirements for transport aspect	13
5.1.6 Compatibility requirements for session aspect	14
5.1.7 Compatibility requirements for data presentation aspect.....	14
5.1.8 Compatibility requirements for application aspect	15
5.1.9 Compatibility requirements for measuring and automation aspect.....	16
5.1.10 Compatibility requirements for semantic aspect	16
5.2 Connectivity non-functional compatibility requirements	17
5.2.1 Compatibility requirements for version compatibility.....	17
5.2.2 Compatibility requirements for QoS management	17
5.2.3 Compatibility requirements for security and privacy aspects	18
5.2.4 Compatibility requirements for compliance.....	21
5.2.5 Compatibility requirements for safety	22
6 Devices and data format compatibility requirements for IIoT connectivity.....	22
7 IIoT system models with IIoT gateways.....	23
8 Network model for IIoT compatibility testing.....	25
9 IIoT device connectivity models	26
9.1 Direct connectivity	26
9.2 Connectivity through IIoT gateway	26
9.3 Connectivity through industrial control systems.....	27
Annex A (informative) Compatibility checklist for devices and services IIoT systems.....	29
Annex B (informative) Load testing scenario for different IIoT devices	32
Annex C (informative) The structure of the IIoT network connectivity infrastructure with the communication networks.....	37
C.1 General.....	37
C.2 Connectivity Level 1.....	40
C.3 Connectivity Level 2.....	40
C.4 Connectivity Level 3.....	41

C.5 Connectivity Level 4.....	42
Bibliography.....	43
Figure 1 – A sample software/hardware set performing conversion between IloT protocols using semantic Industrial Internet of Things gateway (SIIG).....	23
Figure 2 – SIIG architecture example.....	23
Figure 3 – IloT system model with heterogeneous gateways.....	24
Figure 4 – Network model for IloT compatibility testing.....	25
Figure 5 – Direct connectivity.....	26
Figure 6 – Connectivity with IloT gateway.....	27
Figure 7 – Connectivity with an industrial control system.....	28
Figure C.1 – The structure of the IloT network connectivity infrastructure with the communication networks.....	37
Figure C.2 – The traditional Purdue Model.....	38
Table A.1 – Compatibility checklist for devices and services IloT systems.....	29
Table B.1 – The Industrial Internet of Things edge server operation testing based on existing network.....	32
Table B.2 – Testing of interaction between edge and cloud Industrial Internet of Things servers, based on the existing network.....	33
Table B.3 – The Industrial Internet of Things application protocols conversion testing for the heterogeneous IloT gateways and based on the existing network.....	33
Table B.4 – Format of the test sheet for load testing scenarios.....	35
Table B.5 – Example of filling the test sheet defined in Table B.4.....	36
Table C.1 – Mapping of the entities and networks in Figure C.1 to IEC 62264 functional levels.....	39
Table C.2 – Approximate mapping of the network connectivity levels to IEC 62264.....	39

INTERNET OF THINGS (IoT) – COMPATIBILITY REQUIREMENTS AND MODEL FOR DEVICES WITHIN INDUSTRIAL IoT SYSTEMS

FOREWORD

- 1) ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.
- 2) The formal decisions or agreements of IEC and ISO on technical matters express, as nearly as possible, an international consensus of opinion on the relevant subjects since each technical committee has representation from all interested IEC and ISO National bodies.
- 3) IEC and ISO documents have the form of recommendations for international use and are accepted by IEC and ISO National bodies in that sense. While all reasonable efforts are made to ensure that the technical content of IEC and ISO documents is accurate, IEC and ISO cannot be held responsible for the way in which they are used or for any misinterpretation by any end user.
- 4) In order to promote international uniformity, IEC and ISO National bodies undertake to apply IEC and ISO documents transparently to the maximum extent possible in their national and regional publications. Any divergence between any IEC and ISO document and the corresponding national or regional publication shall be clearly indicated in the latter.
- 5) IEC and ISO do not provide any attestation of conformity. Independent certification bodies provide conformity assessment services and, in some areas, access to IEC and ISO marks of conformity. IEC and ISO are not responsible for any services carried out by independent certification bodies.
- 6) All users should ensure that they have the latest edition of this document.
- 7) No liability shall attach to IEC and ISO or their directors, employees, servants or agents including individual experts and members of its technical committees and IEC and ISO National bodies for any personal injury, property damage or other damage of any nature whatsoever, whether direct or indirect, or for costs (including legal fees) and expenses arising out of the publication, use of, or reliance upon, this ISO/IEC document or any other IEC and ISO documents.
- 8) Attention is drawn to the Normative references cited in this document. Use of the referenced publications is indispensable for the correct application of this document.
- 9) Attention is drawn to the possibility that some of the elements of this ISO/IEC document may be the subject of patent rights. IEC and ISO shall not be held responsible for identifying any or all such patent rights.

ISO/IEC 30162 has been prepared by subcommittee 41: Internet of Things and Digital Twin, of ISO/IEC joint technical committee 1: Information technology. It is an International Standard.

The text of this International Standard is based on the following documents:

FDIS	Report on voting
JTC1-SC41/251/FDIS	JTC1-SC41/265/RVD

Full information on the voting for its approval can be found in the report on voting indicated in the above table.

The language used for the development of this International Standard is English.

This document was drafted in accordance with ISO/IEC Directives, Part 2, and developed in accordance with ISO/IEC Directives, Part 1, available at www.iec.ch/members_experts/refdocs and www.iso.org/directives.

IMPORTANT – The "colour inside" logo on the cover page of this document indicates that it contains colours which are considered to be useful for the correct understanding of its contents. Users should therefore print this document using a colour printer.
