Third edition
2018-08

Identification cards — Recording technique —

Part 7: **Magnetic stripe: High coercivity, high density**

Cartes d'identification — Technique d'enregistrement —

Partie 7: Bandeau magnétique: Haute coercivité, haute densité

Reference number
ISO/IEC 7811-7:2018(E)

Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms, definitions, symbols and abbreviated terms	2
3.1 Terms and definitions	2
3.2 Symbols and abbreviated terms	4
4 Conformance	4
5 Physical characteristics of the identification card	4
5.1 General	4
5.2 Magnetic stripe area warpage	4
5.3 Surface distortions	4
6 Physical characteristics of the magnetic stripe	5
6.1 Height and surface profile of the magnetic stripe area	5
6.1.1 Surface profile of the magnetic stripe area	6
6.1.2 Height of the magnetic stripe area	7
6.2 Surface roughness	7
6.3 Adhesion of stripe to card	7
6.4 Wear of magnetic stripe from read/write head	8
6.5 Resistance to chemicals	8
7 Performance characteristics for the magnetic material	8
7.1 General	8
7.2 Testing and operating environment	8
7.3 Signal amplitude requirements for magnetic media	8
8 Data structure	10
9 Encoding specification	11
9.1 Angle of recording	11
9.2 Nominal bit density	12
9.3 Flux transition spacing variation	12
9.4 Signal amplitude requirements	12
9.5 Bit configuration	12
9.6 Direction of recording	13
9.7 Leading and trailing clock bits	13
10 Data structure	13
10.1 Track format	13
10.1.1 Track layout	13
10.1.2 FSC	14
10.1.3 Data frame	15
10.2 Coding for error detection and correction	15
10.2.1 Track CRC	16
10.2.2 Column parity	17
10.2.3 Frame CRC	17
11 Decoding	18
12 Location of encoded tracks	18
Annex A (informative) Compatibility of magnetic stripes (ISO/IEC 7811-6, ISO/IEC 7811-7)	20
Annex B (informative) Magnetic stripe abrasivity	21
Annex C (informative) Static magnetic characteristics	22
Annex D (informative) Reed-Solomon code references	24

Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by ISO/IEC JTC 1, *Information technology, SC 17, Cards and personal identification*.

This third edition cancels and replaces the second edition (ISO/IEC 7811-7:2014), which has been technically revised.

Major changes from the previous edition are as follows:

- the primary standard cards held by Q-Card are used to calibrate the manufacture of secondary reference cards; other primary standard cards held by PTB and Card Testing International (CTI) are used as backup to replace cards held by Q-Card as they wear out;
- deleted reference to character sets in the Scope since none are used in this document;
- list of major differences has been moved from the Introduction to [Annex A](#);
- the supplier of secondary reference cards has changed from PTB to Q-Card.

Notes in this document are only used for giving additional information intended to assist in the understanding or use of the document. They do not contain provisions or requirements to which it is necessary to conform in order to be able to claim compliance with this document.

A list of all the parts in the ISO/IEC 7811 series can be found on the ISO website.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
