A.7	Supported SPDUs .....	10
A.7.1	Kernel functional unit .....	10
A.7.1.1	Supported roles .....	10
A.7.1.2	Support for the SPDUs associated with the Kernel functional unit .....	11
A.7.1.3	Support for the SPDUs associated with Token Exchange .....	11
A.7.2	Negotiated Release functional unit .....	11
A.7.2.1	Supported roles .....	11
A.7.2.2	Support for the SPDUs associated with the Negotiated Release functional unit .....	11
A.7.3	Half Duplex functional unit .....	12
A.7.3.1	Supported roles .....	12
A.7.3.2	Support for the SPDUs associated with the Half Duplex functional unit .....	12
A.7.4	Duplex functional unit .....	12
A.7.5	Expedited Data functional unit .....	12
A.7.5.1	Supported roles .....	12
A.7.5.2	Support for the SPDU associated with the Expedited Data functional unit .....	12
A.7.6	Typed Data functional unit .....	12
A.7.6.1	Supported roles .....	12
A.7.6.2	Support for the SPDU associated with the Typed Data functional unit .....	13
A.7.7	Capability Data functional unit .....	13
A.7.7.1	Supported roles .....	13
A.7.7.2	Support for the SPDUs associated with the Capability Data functional unit ..	13
A.7.8	Minor synchronize functional unit .....	13
A.7.8.1	Supported roles .....	13
A.7.8.2	Support for the SPDUs associated with the Minor synchronize functional unit .....	13
A.7.9	Symmetric synchronize functional unit .....	14
A.7.9.1	Supported roles .....	14
A.7.9.2	Support for the SPDUs associated with the Symmetric synchronize functional unit .....	14
A.7.10	Data separation functional unit .....	14
A.7.11	Major synchronize functional unit .....	14
A.7.11.1	Supported roles .....	14
A.7.11.2	Support for the SPDUs associated with the Major synchronize functional unit .....	14
A.7.12	Resynchronize functional unit .....	15
A.7.12.1	Supported roles .....	15
A.7.12.2	Supported resynchronize types .....	15
A.7.12.3	Support for the SPDUs associated with the Resynchronize functional unit ...	15
A.7.13	Exceptions functional unit .....	15
A.7.13.1	Supported roles .....	15
A.7.13.2	Support for the SPDUs associated with the Exceptions functional unit .....	16
A.7.14	Activity management functional unit .....	16
A.7.14.1	Supported roles .....	16
A.7.14.2	Support for the SPDUs associated with the Activity management functional unit .....	17
A.8	Supported SPDU-parameters .....	18
A.8.1	Connect (CN) SPDU .....	18
A.8.1.1	Connection Identifier .....	18
A.8.1.2	Connect/Accept Item .....	18
A.8.1.3	Single Items .....	19
A.8.2	Overflow Accept (OA) SPDU .....	19
A.8.3	Connect Data Overflow (CDO) SPDU .....	19

## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1. Draft International Standards adopted by the joint technical committee are circulated to national bodies for voting. Publication as an International Standard requires approval by at least 75 % of the national bodies casting a vote.

International Standard ISO/IEC 8327-2 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 21, *Open Systems Interconnection, data management and open distributed processing*, in collaboration with ITU-T. The identical text is published as ITU-T Recommendation X.245.

ISO/IEC 8327 consists of the following parts, under the general title *Information technology — Open Systems Interconnection — Connection-oriented Session protocol*:

- *Part 1: Protocol specification*
- *Part 2: Protocol Implementation Conformance Statement (PICS) proforma*

Annex A forms an integral part of this part of ISO/IEC 8327. Annexes B and C are for information only.

This is a preview of "ISO/IEC 8327-2:1996". [Click here to purchase the full version from the ANSI store.](#)

## Introduction

This Recommendation | International Standard is one of a set of Recommendations | International Standards produced to facilitate the interconnection of information processing systems. It is related to other Recommendations and International Standards in the set as defined by the Reference Model for Open Systems Interconnection (see ITU-T Rec. X.200 | ISO/IEC 7498-1). The Reference Model subdivides the area of standardization for interconnection into a series of layers of specification, each of manageable size.

The goal of Open Systems Interconnection is to allow, with a minimum of technical agreement outside the interconnection standards, the interconnection of information processing systems:

- from different manufacturers;
- under different managements;
- of different levels of complexity; and
- of different technologies.

ITU-T Rec. X.225 | ISO/IEC 8327-1 specifies the Connection-Oriented Session Protocol.

To evaluate the conformance of a particular implementation, it is necessary to have a description of the capabilities and options which have been implemented. Such a description is called a Protocol Implementation Conformance Statement (PICS).

This Recommendation | International Standard includes the PICS proforma for the Connection-Oriented Session Protocol as defined in ITU-T Rec. X.225 | ISO/IEC 8327-1.

## ITU-T RECOMMENDATION

# INFORMATION TECHNOLOGY – OPEN SYSTEMS INTERCONNECTION – CONNECTION-ORIENTED SESSION PROTOCOL: PROTOCOL IMPLEMENTATION CONFORMANCE STATEMENT (PICS) PROFORMA

## 1 Scope

This Recommendation | International Standard provides the Protocol Implementation Conformance Statement (PICS) proforma for the connection-oriented Session protocol specification ITU-T Rec. X.225 | ISO/IEC 8327-1. This PICS proforma is in compliance with the relevant requirements, and in accordance with the relevant guidance for a PICS proforma, given in ITU-T Rec. X.296 | ISO/IEC 9646-7. Detail of the use of this proforma is provided in this Recommendation | International Standard.

The supplier of an implementation which is claimed to conform to ITU-T Rec. X.225 | ISO/IEC 8327-1 is required to complete a copy of the PICS proforma provided in Annex A, and is required to provide the information necessary to uniquely identify both the supplier and the implementation.

## 2 Normative references

The following Recommendations and International Standards contain provisions which, through reference in this text, constitute provisions of this Recommendation | International Standard. At the time of publication, the editions indicated were valid. All Recommendations and Standards are subject to revision, and the parties to agreement based on this Recommendation | International Standard are encouraged to investigate the possibility of applying the most recent edition of the Recommendations and Standards indicated below. Members of IEC and ISO maintain registers of currently valid International Standards. The Telecommunications Standardization Bureau of the ITU maintains a list of currently valid ITU-T Recommendations.

### 2.1 Identical Recommendations | International Standards

- ITU-T Recommendation X.200 (1994) | ISO/IEC 7498-1:1994, *Information technology – Open Systems Interconnection – Basic Reference Model: The Basic Model.*
- ITU-T Recommendation X.214 (1993) | ISO/IEC 8072:1994, *Information technology – Open Systems Interconnection – Transport service definition.*
- ITU-T Recommendation X.215 (1995) | ISO/IEC 8326:1996, *Information technology – Open Systems Interconnection – Session service definition.*
- ITU-T Recommendation X.225 (1995) | ISO/IEC 8327-1:1996, *Information technology – Open Systems Interconnection – Connection-oriented Session protocol – Protocol specification.*

### 2.2 Paired Recommendations | International Standards equivalent in technical content

- ITU-T Recommendation X.290 (1995), *OSI conformance testing methodology and framework for protocol Recommendations for ITU-T applications – General concepts.*  
  
ISO/IEC 9646-1:1994, *Information technology – Open Systems Interconnection – Conformance testing methodology and framework – Part 1: General concepts.*
