## Foreword

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work. In the field of information technology, ISO and IEC have established a joint technical committee, ISO/IEC JTC 1.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO and IEC shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

ISO/IEC TS 19570 was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 22, *Programming languages, their environments and system software interfaces*.

## Contents

<b>1</b>	<b>General</b>	<b>4</b>
1.1	Scope	4
1.2	Normative references	4
1.3	Namespaces and headers	4
1.4	Terms and definitions	5
1.5	Feature-testing recommendations	5
<b>2</b>	<b>Execution policies</b>	<b>6</b>
2.1	In general	6
2.2	Header <experimental/execution_policy> synopsis	6
2.3	Execution policy type trait	7
2.4	Sequential execution policy	7
2.5	Parallel execution policy	7
2.6	Parallel+Vector execution policy	7
2.7	Dynamic execution policy	8
	2.7.1 execution_policy construct/assign	8
	2.7.2 execution_policy object access	9
2.8	Execution policy objects	9
<b>3</b>	<b>Parallel exceptions</b>	<b>10</b>
3.1	Exception reporting behavior	10
3.2	Header <experimental/exception_list> synopsis	10
<b>4</b>	<b>Parallel algorithms</b>	<b>12</b>
4.1	In general	12
	4.1.1 Requirements on user-provided function objects	12
	4.1.2 Effect of execution policies on algorithm execution	12
	4.1.3 ExecutionPolicy algorithm overloads	14
4.2	Definitions	14
4.3	Non-Numeric Parallel Algorithms	15
	4.3.1 Header <experimental/algorithm> synopsis	15
	4.3.2 For each	16
4.4	Numeric Parallel Algorithms	17
	4.4.1 Header <experimental/numeric> synopsis	17
	4.4.2 Reduce	20
	4.4.3 Exclusive scan	20
	4.4.4 Inclusive scan	21
	4.4.5 Transform reduce	22
	4.4.6 Transform exclusive scan	22
	4.4.7 Transform inclusive scan	23
