Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	3
4 Symbols and abbreviations	4
5 Overview	4
5.1 General	4
5.2 Operational sub-phases	4
5.3 Interfaces	6
5.3.1 Interface and protocols for the engagement sub-phase	6
5.3.2 Interface and protocols for the communication sub-phase	6
5.4 Additional methods and operations	6
5.5 Trust model	6
6 Data encoding and parsing of data structures and data elements	7
6.1 General	7
6.2 CBOR encoding	7
6.3 JSON encoding	8
6.4 Parsing encoding information	8
6.5 Engagement for proximity transmission	8
6.5.1 General	8
6.5.2 Engagement structures	8
6.5.3 QR and QR reverse handover	16
6.5.4 NFC static and negotiated handover	16
6.5.5 Timeout	19
6.6 Browser to App engagement (over the Internet)	19
6.6.1 General	19
6.6.2 Engagement structures	19
6.6.3 Deep links URL with URISchemes	19
6.6.4 Deep link URLs that resolve to a specific App	20
6.6.5 Profile specific methods	20
7 Device retrieval	21
7.1 General	21
7.1.1 Operation	21
7.1.2 End to end encryption	21
7.2 Operation messages	21
7.2.1 Device request	21
7.2.2 Device response	26
7.2.3 Device Engagement message	31
7.2.4 OID4VP Authorization request	32
7.2.5 Credential holder verification	32
7.3 E2EE transport messages	35
7.3.1 Session Establishment	35
7.3.2 Session data	35
7.3.3 JWT Secured Authorization Response Mode (JARM)	36
7.4 Device retrieval using proximity transport	36
7.4.1 NFC	36
7.4.2 BLE	37
7.4.3 Wi-Fi Aware	42
7.5 Device retrieval over the Internet	44
7.5.1 Device retrieval with E2EE for both request and response	44
7.5.2 OpenID for Verifiable Presentation	46

ISO (the International Organization for Standardization) and IEC (the International Electrotechnical Commission) form the specialized system for worldwide standardization. National bodies that are members of ISO or IEC participate in the development of International Standards through technical committees established by the respective organization to deal with particular fields of technical activity. ISO and IEC technical committees collaborate in fields of mutual interest. Other international organizations, governmental and non-governmental, in liaison with ISO and IEC, also take part in the work.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of document should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives or www.iec.ch/members_experts/refdocs).

ISO and IEC draw attention to the possibility that the implementation of this document may involve the use of (a) patent(s). ISO and IEC take no position concerning the evidence, validity or applicability of any claimed patent rights in respect thereof. As of the date of publication of this document, ISO and IEC had not received notice of (a) patent(s) which may be required to implement this document. However, implementers are cautioned that this may not represent the latest information, which may be obtained from the patent database available at www.iso.org/patents and <https://patents.iec.ch>. ISO and IEC shall not be held responsible for identifying any or all such patent rights.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see www.iso.org/iso/foreword.html. In the IEC, see www.iec.ch/understanding-standards.

This document was prepared by Joint Technical Committee ISO/IEC JTC 1, *Information technology*, Subcommittee SC 17, *Cards and security devices for personal identification*.

A list of all parts in the ISO/IEC 23220 series can be found on the ISO and IEC websites.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html and www.iec.ch/national-committees.

This document covers the operational phase introduced by ISO/IEC 23220-1. This document also expands on ISO/IEC 18013-5, especially regarding reader engagement, over the internet device retrieval operation and connections to other International Standards. It also expands operational data elements, such as for credential holder authentication, operations involving data elements from identical or different types of documents, and more.

Implementation conformant to ISO/IEC 18013-5 meets all requirements on selected building blocks specified in this document.
